BizBuilder Business Plan

Use these worksheets and questions to create a complete business plan. Follow the guidelines in Chapter 4 to ensure the quality of the business plan. The tables and questions are designed to help you organize your plan and are not necessary to include as tables in the final plan. By using the worksheets and questions your plan will be a better roadmap for running your organization and will make it more attractive to investors.

1.0 Executive Summary

The Executive Summary is your primary selling section of the business plan. It should be clear, concise and compelling. Within 1 to 2 pages, the reader should be interested, engaged and well-informed about your business model, your requirements, and expectations.

A. What is the full legal name of your organization?

Looplet

B. Describe your business idea using Table 1.1 to guide the coverage of pertinent topics. Select them according to whether you are planning a start-up, purchasing an existing business, securing a franchise, or licensing technology. If you are expanding a firm, you can follow the guidelines which fit best.

Table 1.1 Executive Summary Description Guide				
Components of the Business	Start-Up	Buy Existing	Secure a Franchise	License Technology
Customers	None	Established	None - but may have name recognition	None
Products or Services	None	Established	Developed	In process
Location	Needed	In place	Assistance possible	Needed
Management Control	Owner	Owner	Owner within terms of license	Owner within terms of license
Operational Control	Owner	Owner	Owner within terms of license	Owner
Marketing	Needed	In place (+/-)	Assistance possible. Rules absolutely.	Needed
Reputation	None	In place (+/-)	Should be. If not, why license?	Possible
Royalties/Fees	Not usual	Maybe	Ongoing	Likely

Financing	Needed	Prior owner may provide	Assistance possible	Needed
Disclosures	None	Buyer beware	UFOC & contracts	Agreement

Our business best fits the **Start-Up** category and that means that we will:

- build a new mobile marketplace platform from scratch,
- develop all core features internally (approval system, in-app chat, donation feature, request board),
- create our own user base and reputation,
- secure funding for app development, marketing, and operations,
- focus on a new B40-oriented social impact model not previously offered in Malaysia.

C. Target Market (Answer who, what, when, where, and why.)

Table 1.2 Target Market Description	
Factor of Target Market	Description
(who)	Malaysia's B40 community, low-income families, students, gig workers, and cost-conscious buyers.
(what)	Affordable secondhand essentials like electronics, home items, baby products, clothing, medical equipment, etc.
(when)	Daily essential needs; especially during times of financial pressure or rising cost of living.
(where)	Across Malaysia
(why)	To access low-cost, safe, verified, secondhand goods and earn side income through selling

D. What type of organization are you starting? (*Manufacturing, Wholesale, Retail? For-profit or not-for-profit?*)

Retail, C2C digital marketplace (For-profit).

E. What products and/or services will you offer?

Table 1.3 Product/Service Offerings	
Products/Service	Description

Core Transaction Platform	A verified secondhand marketplace for B40 users with listing approval, in-app chat, and secure transactions.
Request Board	Users post essential items they need; others can donate or sell to them.
Donation System	A frictionless donate button allowing users to give away items through NGOs or directly to families.
Seller Value-Added Tools	Verified Seller subscription, boosted listings, analytics.

F. What is your marketing and sales strategy? Explain how your business idea will satisfy a customer need.

Table 1.4 Marketing & Sales Strategy	
Customer Need	How Your Business Will Satisfy It
Affordable necessities	Price-lock system and approval to ensures all prices remain affordable.
Safe transactions	Verification, authenticator, reporting and review tools.
Easy access to essentials	Request Board helps users locate needed items quickly.
Income opportunity	Low commissions and high visibility for B40 sellers.
Lower logistics cost	Local pickup, subsidized delivery.

G. Describe the key success factors for the organization.

Table 1.5 Key Success Factors	
Success Factor	How It Works within Your Organization
Affordability	Price limits & approval system maintain low-cost essentials.
Trust & Safety	Verification, approval, authenticator tools reduce scams.
Community Impact	Donations, request board, NGO partnerships.
User Experience	Simple UI, auto-translation, easy chat.

H. Calculate the “economics of one unit” for your organization.

Table 1.6 Economics of One Unit	
One Unit	

Selling Price per Unit	N/A
– COGS per Unit	N/A
– Other Variable Costs	N/A
TOTAL Variable Costs per Unit	N/A
Contribution Margin per Unit	N/A

I. What are your short-term business goals? (less than one year) Long-term business goals? (from one to five years)

Table 1.7 Business Goals	
Short-Term Goal	Measure of Success
Launch Looplet app	Fully functional app on iOS/Android
Acquire first 3,000 active users	Monthly Active Users (MAU) data
Establish NGO partnerships	At least 3 confirmed collaborations
Long-Term Goal	Measure of Success
Expand to 12,000 MAU	Analytics and transaction data
Achieve profitability	Positive net income in Year 3
Regional expansion	Availability in 1–2 SEA countries

J. What resources and skills do you (and the other owners and managers) have that will help make your organization successful? What other skills are needed and how will they be obtained? These would include operations, finance, accounting, sales, management, and the like.

Table 1.8 Skill and Resource Inventory		
Resource or Skill	Who Has the Skill/Resource?	If Needed, How Will It Be Obtained?
App development	Software engineering team	Hire skilled developers
Finance/accounting	Group members & accountant advisor	External accounting firm
Marketing	Marketing team + student social media expertise	Hire digital marketer
UX/UI	Internal designers	Training + external consultants

Operations	Founders	SOP development + interns
------------	----------	---------------------------

K. If there is more than one owner, describe how the ownership will be shared.

Table 1.9 Ownership	
Owner	Percent of Ownership
Vanessa Louise Farrin	12.5%
Valeska Adelaide Yang	12.5%
Sureena Kulasingam	12.5%
Alysha Yasmine	12.5%
Victoria Heidi	12.5%
Orion Chan Zen Ji	12.5%
Li Fu Yang	12.5%
Wu Bin	12.5%

L. What are the sources and uses of funds?

Table 1.10 Sources and Uses of Funds			
Sources of Funds	Amount Received	Uses of Funds	Amount Spent
Founders' capital	\$20,000	App development	\$36,000
Grant applications	\$30,000	Marketing	\$10,000
Sponsorship/partners	\$5,000	Cloud infrastructure	\$4,000
		Staff & operations	\$5,000

M. Include a summary of the financial projections.

Table 1.11 Summary Financial Projections			
Topic	Key Measure	Growth or Growth Rate	Time Frame
Revenue	Sales Growth	Rapid growth	Years 1–3
Profitability	Return on Investment or Return on Sales	Improving	Years 1–3

Industry Position	Market Share	Upward trend	Years 1–3
Value	Net Worth	Steady	Year 3

N. What is the growth and exit strategy? (For example, self-generated growth, growth through merger or acquisition, franchising, sale of the company, IPO)

Local partnerships can be strengthened through collaborations with NGOs and community organisations to increase outreach and user participation. Continuous feature improvements and expanding our user base will help us generate steady growth. In the long term, we plan to scale our platform across Southeast Asia, including Indonesia and the Philippines, to widen our market reach. As for our exit strategy, investor repayment will be carried out through structured debt repayment and a planned stock buyback.

2.0 Mission, Vision & Culture

A. Write a mission statement for your organization in 21 words or fewer that clearly states your competitive advantage, strategy, and tactics.

Supporting Malaysia’s B40 community with a trusted secondhand marketplace that ensures verified users, fair pricing, and secure transactions.

B. Create a vision statement for your organization.

Looplet aims to establish a community-driven marketplace where Malaysia’s B40 community can safely buy and sell secondhand goods. By promoting sustainable living, financial independence, and strong community connections, we vision a future of “free poverty”, where economic opportunities are accessible to all. Aligning with the objectives of SDG 1, our goal is to create a meaningful social impact that strengthens communities across Malaysia and creates a thriving, inclusive, and supportive community.

C. Describe the core beliefs you will use to run your organization and how they will be reflected in its culture.

Table 2.1 Core Beliefs and Culture	
Core Belief	How It Is Reflected in the Culture
Purpose driven	All the work done within the organization contributes to reducing poverty and promotes sustainability, which gives the team a sense of purpose.

Integrity	Employees are encouraged to be open, honest and responsible in everything they do. Ensuring decisions are fair and ethical.
Continuous growth	Encouraging the team to learn by actively participating in discussions, asking questions, training skills and help each other.
Respect	Employees work together, creating a supportive and inclusive environment.

D. Identify the ways you plan to run a socially responsible organization.

Providing verified B40s sellers with verified B40 sellers with reduced commission fees, free shipping and monthly vouchers, and featuring and highlighting their products to reach more audience.

3.0 Company Description

A. What industry (or industries) are you in? (Identify each industry, find its NAICS Code and list the products/services that you will offer which fit the category.)

Remember you can go to the U.S. Census Web site to identify your industry code and obtain some data (<http://www.census.gov>).

Table 3.1 Industry		
Industry	NAICS Code	Products/Services
Electronic Shopping and Mail-Order Houses	454110	Online marketplace platform
Used Merchandise Retailers	459510	Resale or selling secondhand goods
Software Publishers	513210	Mobile application development and maintenance
Local Messengers and Local Delivery services	492210	Provides local delivery services

B. What type of organization is it (*manufacturing, wholesale, service*)?

Service

C. What needs will this business satisfy? (Same as Table 1.4)

Table 3.2 Marketing & Sales Strategy

Customer Need	How Your Business Will Satisfy It
Affordable goods	Looplet promotes buying and selling of secondhand goods, at lower prices and real product conditions.
Quick access to essentials	Community posts allow buyers to ask for specific items, making it easier for sellers to respond and sell items.
Ease of use	User friendly interface with In-app messages, auto-translation, organized categories, and multiple shipping options.
Trust and credibility	MyKad verification, user reviews, delivery proofs, and reporting tools to reduce potential fraud and increase trust.
Income opportunity	Provides lower commission rates, boost visibility, and a wide buyer audience to help B40 users earn extra income.
Lower shipping expense	Offers free shipping for verified B40 users, seller-buyer split shipping costs, e-lockers and partnerships with affordable delivery services.

D. What is your strategic advantage?

Looplet will stand out more as we offer more than just a secondhand marketplace app, we combine an affordable and secure platform with a strong social mission. By providing the B40 community with lower platform fees, boost visibility for their listings, and a secure place to buy and sell, we create opportunities that most secondhand marketplace apps did not focus on. This blend of accessibility, trust, and community support is what differentiates Looplet.

E. What is your organization's legal structure (*sole proprietorship, partnership, LLC, C Corp, etc.*)?

Limited Liability Company

F. Why did you choose this legal structure?

As a startup, we chose LLC because it separates the business from owners, protecting owners' personal assets from business liabilities. LLC offers a simple formation process, pass-through taxation, and flexible management, making it an ideal structure for a growing platform like Looplet.

G. In what state are you registered or do you intend to register?

Kuala Lumpur

H. Where will you physically operate the organization?

Bukit Bintang

I. What is the geographic reach of the organization?

Across Malaysia

J. Who will be the owner(s), partners, or stockholders for your company? If your business is incorporated, describe what percentage of the company is owned by each shareholder. (same as Table 1.9)

Table 3.3 Ownership	
Owner	Percent of Ownership
Vanessa Louise Farrin	12.5%
Valeska Adelaide Yang	12.5%
Sureena Kulasingam	12.5%
Alysha Yasmine	12.5%
Victoria Heidi	12.5%
Orion Chan Zen Ji	12.5%
Li Fu Yang	12.5%
Wu Bin	12.5%

4.0 Opportunity Analysis & Research

A. Describe your research methods (*surveys, focus groups, general research, and statistical research*). Select only those that apply. Be specific about how you will select your respondents and sources. Remember to ensure the integrity of your data.

Table 4.1 Research Methods		
Research Method	When?	Respondents/Description
Written Survey (mailed)	-	-

Written Survey (emailed)	-	-
Written Survey (online)	Ongoing	Gathered feedback on our app and information from B40 individuals.
Telephone Survey	-	-
“Street” Survey	Few weeks ago	Approached the public in Bukit Bintang and initiated a street interview to gain insights.
Focus Groups	Quarterly	Created a focus group session with underprivileged individuals to gather information on their struggles and feedback on our service.
Document Research – Review of Books and Records	-	-
Personal Interviews	-	-
Observation	Weekly	Observing users interacting with our app and noting peak usage times, popular features, and common behaviours.
Tracking (Media)	-	-
Benchmarking	Annually	Comparing the performance of our app against other second-hand marketplace platforms to identify areas for improvement.
Online Searches	Ongoing	Looked up information on B40 needs and digital marketplace trends from credible online sources.
Article and Book Searches	Ongoing	Reviewed academic journals, government reports, and market studies on B40 communities and second-hand markets.
Trade Associations	-	-
Chambers of Commerce	-	-
Public Agencies	-	-
Competitor Websites	-	-

B. Describe your target customer along as many dimensions as you have defined (i.e., demographic, geographic, needs, trends, decision-making process).

Table 4.2 Target Customer	
Dimension	Target
Demographic	B40 households, low-income earners, single parents, students with families with limited funds, elderly people who require affordable basic needs.
Geographic	The main one will be urban and semi-urban in Malaysia (e.g., Kuala Lumpur, Selangor, Penang, Johor), and will be extended to the rural areas in the future by engaging the NGOs.
Needs	Availability of inexpensive necessities (infant needs, health technology, and clothes, appliances); income-generating chances; secure, dependable market; donation facilitation.
Trends	More people are turning to second-hand products; expanding the digital presence of low-income earners; growing sustainability consciousness; growing demand for low-cost household products.
Lifestyles	Budget-conscious, civic-focused, practical; tend to have a variety of work or other commitments; depend on cost-cutting options.
Psychographics	Value-conscious, industrious, driven by cost-effectiveness; skeptical of frauds; like platforms with integrity, openness, and reinforcement; and valuing donation options.

4.1 Industry Analysis

A. What is the industry or set of industries in which your organization operates (include the NAICS codes)? Remember you can go to the U.S. Census Web site to identify your industry code and obtain some data (<http://www.census.gov>). Same as Table 3.1.

Table 4.3 Industry		
Industry	NAICS Code	Products/Services
Electronic Shopping and Mail-Order Houses	454110	Online Consumer-2-Consumer (C2C) digital marketplace that allows users to buy and sell preloved goods

Local Messengers and Local Delivery services	492210	Provides local delivery services
Software Publishers	513210	Mobile application development and maintenance

B. What factors influence the demand for your product or service?

Table 4.4 Demand Influences	
Demand Factor	How Does it Influence Demand?
Rising cost of living	Increase the demand for affordable goods (used/new)
Digital marketplace growth	Malaysians are comfortable buying and selling goods online, raising the demand for safe platforms
Population density	Increase in people, increase in seller and buyers
Social impact motivations	People wanting to donate and support low-income communities will be drawn to Looplet's features

C. What factors influence the supply for your product or service?

Table 4.5 Supply Influences	
Supply Factor	What Is the Influence?
Used items availability	People frequently sell used items, increasing the supply for the app
Seller motivation	B40 will be motivated to sell unused items for extra cash, increasing listing amount
Competition from other platforms	High competition will reduce supplies
Economic downturns	People sell more during economic downturns to gather more income

D. How large is your industry (*historic, current, projected size*)?

Table 4. 6 Industry Size			
Time Frame	Dates Included	Size (\$ or units)	Data Source
Historic size	2019-2022	Rm2-2.2 billion	Carousell Recommerce Report

Current size	2023-2025	Rm3 billion	Carousell Group
Projected size	2026-2030	Rm 4.5 - 5 billion	Market forecasts on C2C

E. What are the current and anticipated characteristics and trends in the industry?

- Growing demand for mobile first platforms
- Higher demand for digital safety
- Rising of social commerce
- Demand for affordable goods
- AI assisted listings

F. What are the major customer groups for the industry (*consumers, governments, businesses*)?

B40 communities

G. How large is your target market (*number of customers, size of purchases, frequency of purchases, trends*)?

Table 4.7 Target Market Size		
Measures of Market Size	Size	Source of Data
Number of customers	3.2 million B40 households	DOSM
Size of purchases	RM10-150/ transaction	Marketplace benchmarks
Frequency of purchases	1 to 5 transactions/month	Carousell activity pattern
Trends	Increase in demand for preloved goods due to rise in cost of living	DOSM

4.2 Environmental Analysis

A. Perform a SWOT analysis of your organization. Remember that strengths and weaknesses are internal for an organization and that opportunities and threats arise from the external environment.

Strengths • Offers affordable necessities to B40 communities (SDG1 compliance) • Large product portfolio: fashion and beauty, electronic appliances, babies and kids, medical equipments and many more) • Model of community support of selling and donating items • Less risky and more organised than unverified resale groups • Mobile- first and user-friendly interface to all literacy levels • Has maximum limit price on each item to adhere to the affordable part	Weaknesses • Poor brand awareness relative to the established competitors (Carousell, Mudah.my) • Less inventory and user posts in initial stage launching • The dependence on the involvement of the user in making donations and product diversity is high • The costs of user verification and the management of the platform • Quality management is a problem because of a broad scope of necessary products
Opportunities • Increasing demand of B40 households on low-cost essential goods • Improving reuse and sustainability awareness in Malaysia and Southeast Asia • Potential collaborations with social enterprises, childcare centres, hospitals and NGOs • Government programs encouraging digitalisation and alleviation of poverty • Tapping into regional markets where there are high levels of thrift and second-hand culture	Threats • High competition posed by existing resale solutions (Carousell, Mudah.my, Facebook Marketplace) • Unstable economy of the users to afford even cheap products • Possible fraud or issues related to safety or abuse to the reputation of the platform • Rapidly evolving technology and requirements of users that demand constant evolving • Aggression of low prices by the fast retail or appliance brands.

B. Are there customers for your business in other countries? How do you plan to reach them?

Yes, there may be potential customers of Looplet in other nations, especially in the Southeast Asian region where the challenge of affordability is very high and secondhand culture is very prevalent. Indonesia, the Philippines, Vietnam, Thailand and Myanmar have high populations with low incomes, and they habitually use thrift markets, used stuff and donations in the community to get the necessary goods. Since Looplet targets low-end products, including household goods, baby products, clothing, small appliances and general medical equipment, the site fits into the interests of such communities. Also, the mobile phone penetration and buying-and-selling behaviour online are high in these countries, thus they are good markets to apply Looplet mobile-first model of community-driven approach.

Looplet will grow using localisation, strategic partnerships and target digital engagement to access the international customer base. This platform can be localised to regional languages and currencies to make sure that users in other countries access and find it relevant. Collaborations with NGOs, hospitals, childcare centres and social enterprises will assist Looplet to reach communities that often make contributions or redistribute needed items, reinforcing its social impact. Looplet will also depend on social media marketing in different platforms like TikTok, Instagram and Facebook to connect to active thrift communities, which will be backed up by partnerships with local micro-influencers who can earn trust in a region. Also, university and community ambassador programmes can support the entry of Looplet in new markets by taking advantage of young technologically-minded users. Lastly, the collaboration with low-cost logistical companies will allow the cross-border delivery or delivery to the door, which should guarantee that the most necessary items can circulate freely within the communities. These strategies will help Looplet to successfully expand its mission and target foreign users who will be enjoying available, affordable and basic products.

4.3Competitive Analysis

A. How do you define/describe your competition--both direct and indirect?

Looplet is in the larger resale and second hand market, which implies that it has direct and indirect competition. Direct competition will be well-known online marketplaces like Carousell, Facebook Marketplace and Mudah.my, where people can sell and buy a great variety of second hand products like appliances, baby products, clothes, and more which is identical to the services provided by Looplet. These platforms are high visibility and with huge user

bases thus they are strong competitors. They do not however usually have a well an organised safety net, community based donation systems and low-income-based models. Besides the online competitors, Looplet is also directly experiencing competition with local thrift stores and charity-based resale centres that sell or give away the essential products at low prices.

The traditional retailers, discount outlets and fast-retailing brands are viewed as indirect competitors as they are selling new products at low prices that may decrease the necessity of consumers to purchase the second hand goods. WhatsApp groups, neighbourhood, community groups and Facebook groups of 'jual-beli' page are also indirect competitors since these informal channels of buying and selling do not include a formal platform. Though these channels are not structured and safe, they are very common because of comfort and familiarity. A combination of these both direct and indirect competitors makes the environment complex where Looplet should distinguish itself in terms of purpose-driven features and community value.

B. Describe your competitive advantage.

The main competitive advantage of Looplet is a good social mission and the intentional correspondence to SDG1: No Poverty. In contrast to the general marketplaces, Looplet is meant to serve the B40 households directly by providing the households with affordable essentials and allowing users to earn additional incomes either by selling, trading or donating goods. This makes Looplet not only a marketplace, but a community-support system in which one of its goals is economic empowerment. The safety-conscious nature of Looplet, which comprises approved user profiles, and the categorisation of items, among others, is another significant strength of the platform that is considerably safer and more reputable than Facebook Marketplace or unofficial selling communities.

Also, Looplet has an inbuilt donation option that lets users donate necessary items, including baby strollers, clothing, appliances and many more to a family or non-governmental organisation in need, which provides social impact, which competitors do not actively intend to provide. The mobile-first design and simplicity of the platform also contribute to the high level of accessibility of the platform to users of varying digital literacy, especially among the lower-income communities. Looplet has developed a unique competitive niche, which makes it different to large competitors who are less focused by integrating affordability, safety, usability and social value.

C. Find three competitors and describe them using the table below or an EXCEL spreadsheet. You can also use a format defined in the text. Using a scale of 1 to 5 with 1 being the lowest score and 5 being the best, rate your company and your top 3 competitors on dimensions that apply to your business. The ones provided are suggestions.

Table 4.8 Competitive Analysis									
	Wt.	<i>Looplet</i>		Carousell		Mudah		Facebook Marketplace	
		Rating	Wtd. Rating	Rating	Wtd. Rating	Rating	Wtd. Rating	Rating	Wtd. Rating
Quality	0.15	4	0.60	3	0.45	3	0.45	2	0.30
Price	0.20	5	1.00	4	0.80	4	0.80	3	0.60
Location	0.10	4	0.40	5	0.50	5	0.50	5	0.50
Selection	0.20	4	0.80	5	1.00	5	1.00	5	1.00
Service	0.15	4	0.60	3	0.45	2	0.30	3	0.45
Speed or Turnaround	0.10	3	0.30	4	0.40	5	0.50	4	0.40
Specialization	0.05	5	0.25	2	0.10	1	0.05	2	0.10
Personalization	0.05	5	0.25	3	0.15	2	0.10	3	0.15
Total	1.00	34	4.2	29	3.85	27	3.4	27	3.5

Note: The weights for all of the factors must add up to 1.00. Weights should be based upon the importance of the factor to the customer. *Weighted Rating = Weight x Rating*. To compare firms, total the Weighted Rating for each company.

D. Describe any international competitors you have found who may be able to access your customers. How do you intend to compete?

Table 4.9 International Competition	
International Competitor	Method of Competition

OLX (Global Classified Platform)	Competing based on high product mix, good global brand awareness and user-to-user resale mechanisms established in most countries
eBay (International Online Marketplace)	Provides cross-border access to secondhand goods, policies of a high buyer protection and competitive pricing of both new and used items
TikTok Shop / Facebook International Sellers	Indirect competition based on the sale of low-value necessities via social commerce to meet the needs of the target audience in terms of affordability and convenience

E. Describe your strategy for outperforming the competition.

Table 4.10 Competitive Advantage	
Competitive Advantage Question	Competitive Difference (USP)
<i>The Offer:</i> What will be better and different about the products and services that will be sold by the business?	Looplet offers basic commodities- baby products, medical items, etc. at a very low price with verified listings and option to donate which keeps everything safe and give back to the community.
<i>Target Market:</i> To make it as successful as possible, which customers should be the focus of the business?	Looplet targets mostly B40 households, students, single parents and low-income earners in need of the affordable necessities and helps the NGOs and community centres that depend on the donation of goods as well.
<i>Production and Delivery Capability:</i> What will be better or different about the way that offer is produced and delivered to those customers?	Looplet guarantees safer and more trustful delivery with the help of verified accounts, organised listings, NGO collaboration and optional community pick-up points to save a delivery cost and make it more accessible.

F. What tactics will you use to carry out this strategy?

Table 4.11 Marketing Tactics		
Tactical Question	Issues	Solutions

<i>Sales Plan:</i> Where and how will you sell to your customers?	How to identify prospects and convert them to sales	Connect directly with users through use of mobile-first application, community pop-up events, NGO relationships and university outreach.
<i>Market Communications:</i> How will you communicate with your customers and make them aware of your business offer?	How to make customers aware of your offer; how to attract them to the business	Create social media campaigns, TikTok content, Facebook groups, micro-influencers, ambassadors, and partner with local centres to create awareness.
<i>Operating Plan:</i> How will you manage your internal operations?	How to make the business go, and determine who will perform the tasks	Provide specific verification, partner liaison and community management roles; list checks and communication using automated tools.
<i>Budget:</i> How do you plan to manage your revenues and expenses?	Possible sources of revenue; possible items that have to be purchased	Make a profit by charging small transaction fees, upgrading to premium sellers, and support by NGOs; maintain low spending by forming partnerships and using community pickup points.

G. What barriers to entry can you create to support your organization?

The business will establish an enabling ecosystem that incorporates affordability, safety, and community partnerships to ensure Looplet is not exposed to any competition and to provide a strong barrier to entry. The creation of long-term partnerships with NGOs, hospitals, childcare centres, and universities makes Looplet an inseparable part of local communities and ensures that it is hard to duplicate this presence on the global level. Authenticated user systems, giving methods and local pick-up spots also establish procedures of operation that competitors would have to invest a lot of time and resources before emulating. Moreover, the high social mission and the compatibility of Looplet with SDG 1 create trust and goodwill with the B40 households, which provides the platform with an excellent emotional and social edge. With the increase in user base, Looplet will enjoy the network effects, in which the more there are listings the more buyers will be attracted, as well as donors, making a platform more useful as

time goes by. All these factors form a powerful protective barrier that is in favor of long-term sustainability and competitiveness of Looplet.

5.0 Marketing Strategy & Plan

A. Explain how your marketing plan targets your market segment.

Table 5.1 Market Segmentation		
Segmentation Method	Segment(s)	Marketing Approach
Geographic	Our primary focus is on Malaysian cities and communities that have a significant B40 population.	To reach a wider audience, we set up local pickup locations and host in-person events in collaboration with neighborhood NGOs and community centers. By utilizing localized social media content and activities, we improve regional relevance.
Demographic	B40 low-income individuals/families (primary target)	For the B40 group: "ensuring affordability" and "trustworthy necessities" are central to the message. Networks of partner NGOs are used for promotion, with a focus on how the platform saves them money.
Psychographic	Value-for-money/ Financial Security Seekers. Local-minded and selfless people. Green conscious and sustainable lifestyle users.	To Value Seekers: Do the marketing around the "Approval System" and the general philosophy that "Everyone Deserves Good Things!" To the Community-Minded: Display the "Donate" and "Request board" feature and highlight the way it promotes the culture of giving and empowering communities. To be Eco-Conscious: Show how the platform can help in the minimization of

		waste and can publish Sustainability Reports.
Behavioral	Customers that want secondhand and inexpensive necessities. Sellers who want to clear their rooms and make money within a short period of time. Users who are ready to give donations and engage in community mutual aid.	To Bargain-Hunting Buyers: Be very clear on the approval system and authenticator feature to build trust. Activities Be proactive to address their unique needs via the Request board. To Income-Seeking Sellers: Emphasize on the safety and community aspect of the platform, and the ease of the in-app chat feature. Market the subscription to Verified Seller in order to make their items better seen. To the Donors: Make it easy to give: Use social impact stories to demonstrate how their donation tangibly benefits a B40 family, giving them emotional satisfaction.

B. Write a positioning statement for your business.

(Your business name/brand) is the (competitive/industry category) that (provides these benefits or points of difference) to (audience/target market).

Looplet is the trust and community based secondhand marketplace that ensures affordability and verification of items and social empowerment to the Malaysian B40 population and environmentally conscious consumers.

C. How do you plan to grow the organization (self-generated, franchising, acquisition)? Select only the method(s) that apply to your company.

Table 5.2 Growth Plans		
Method of Growth	Planned? Y/N	Description
Self-generated	Y	It is our fundamental development plan. Our strategy will be to keep on optimizing the features of the app, further collaborating with local NGOs and community centers, and do specific

		community marketing to the B40 segment of the population to naturally increase the number of users and transactions. The platform revenue will be reinvested in technology development, marketing and team building to realize organic and controlled growth.
Franchising	N	Our platform has been based on integrated brand trust, verification, and community culture. The franchising system would complicate the idea of ensuring the consistency of standards of services and safety at the locations, which is incompatible with our main value of trust.
Acquisition	N	Being a startup, we do not have the financial strength and management ability to acquire other companies. We are concerned with implementing our business model and serving the B40 population.
Other	N	No other plans at this stage.

5.1 Products/Services

A. What products/services do you intend to sell? (Table 5.3 is identical to Table 1.3)

Table 5.3 Product/Service Offerings	
	Description
Core Transaction Platform	Trust-Based C2C Marketplace: An application targeted at the Malaysian B40 segment to sell and purchase verified and low-cost secondhand necessities (e.g., household appliances, electronics, furniture). The main ones are an in-app chat system, listing approval process, and secure transaction environment.
Mutual Aid Characteristics of the Community.	Community Empowerment and Mutual Aid Services: The platform has a dedicated functionality feature that is designed to assist the community, including a Request board where users can make requests and a simple Donate button, which makes it possible to give to the community and help them become socially empowered.
Seller Value-Added Services	Seller Tools and Subscription Services: Seller value-added services, including a Verified Seller Subscription to increase the visibility of an

	item. The essence is to offer a trusted platform that can assist users to de-clutter and earn money in a short period.
Data and Business Services	Data Insights and Business Cooperation: The profit-generating B2B services, such as selling anonymous consumer trend information to a research institution or partner, sustainability reporting to an NGO, and in-app advertising slots to qualifying sustainable or local brands, are maintained.

B. Explain how your product will meet a customer's needs

1. Ensuring Essentials are Affordable and Easy to Access

The B40 community has financial limitations on a daily basis and it is hard to afford basic needs such as house appliances, furniture, and electronics. Looplet is not only a marketplace, but a committed platform of cheap secondhand goods. The price approval system makes sure that the items listed are within the budget friendly bracket. This allows families to purchase products that they might otherwise afford.

2. Ensuring Trust and Safety

The current sites are full of scams, product inaccuracies, and untrustworthy sellers which pose a high-risk setting to low-income users who simply can not afford to lose money.

Looplet creates a platform of trust by its Approval System and MyKad Authenticator. All the listings are revised prior to their going public so that photos and descriptions are correct. This authentication ensures that fraud is avoided and that a secure atmosphere is established in which the B40 customers will be able to shop with confidence, something that they would not get on other sites.

3. Empowering the Community

The B40 community requires charity, but they require decent methods to make their situation better. Our platform transcends mere business. The "Request Board" enables the user to actively request the acquisition of certain items they require. The "Donate" option offers a straight and respectable way of community mutual aid. This serves the purpose of social empowerment so that users feel to be in a supportive community and not merely beneficiaries.

4. Providing Sellers with Fast and Reliable Revenue

Sellers and possibly members of the B40 community, should clear their houses and earn more money within a short time and risk-free. The site offers a secure community-based place to sell

idle belongings. The chat program also allows fast negotiations, and the reliable community of buyers encourages fast sales. The Verified Seller Subscription also assists those who are serious sellers to get more visibility and sell at an even quicker rate. This directly allows users to “clean up and earn cash fast.

C. Where is your product/service in the product life cycle? Each product should be in one of these stages based upon its industry and the like. You may have multiple products in the same industry, but some are new to the industry and are in the introductory stage while others are more mature products. The industries you are in also may be at various stages of the product life cycle and can be indicated here as well.

Table 5.4 Product/Service Life Cycle Stages					
	Introduction	Growth	Maturity	Decline	Industry?
Core Transaction Platform	✓				Secondhand Trading Company
Mutual Aid Characteristics of the Community	✓				Community Services
Seller Value-Added Services		✓			Platform Value-Added Services
Data and Business Services	✓				Data Services

D. Describe the features and benefits of the product/service your business will focus on selling.

Table 5.5 Features and Benefits		
Product/Service	Features	Benefits
Core Transaction Platform	Listing approval system Price review mechanism In-app chat system Essential goods focus	Assures product authenticity and creates trust. Retains low prices on B40 community. Facilitates buyer-seller communication.

		Assists users to locate daily needs rapidly.
Mutual Aid Characteristics of the Community	Request Board Donation function Community impact stories	Gives the users the right to search particular required items. Encourages mutual aid and support of communities. Establishes relationships with the community and shows social worth.
Seller Value-Added Services	Considered Seller subscription. Improvement of product visibility. Quick listing tools	Gives credibility and trust to seller. Grows sales turnover and earning. Facilitates the selling process and saves time.
Data and Business Services	Anonymous consumer analytics. Sustainability reporting Tailored advertisement services.	Gives partners market intelligence. Helps NGOs gauge social impact. Facilitates access to relevant target groups by the brands.

E. What copyrights or patents do you own or expect to own?

We currently own the copyrights for the app's source code, user interface graphics and marketing content. We have patent pending for our unique features such as listing approval system and the request board. We plan to protect the Looplet name, logo and branding through trademark in the future.

F. How will your organization help others? List all the organizations to which you plan to contribute. (Your contribution may be time, money, your product, or something else.)

Table 5.6 Philanthropic Plans			
Organization	Constituency	Contribution	Rationale
Malaysian Red Crescent Society	Disaster-affected communities.	Giving away basic commodities via our site	Immediate relief to B40 families hit by natural disasters.

		+ 5 per cent of the annual earnings.	
Tzu-Chi Foundation Malaysia	Low-income families.	Free delivery service of the donated goods + Volunteer time by our team.	Provide logistics and resources to their current charity network.
Pertiwi Soup Kitchen	Homeless and urban poor	Kitchenware and clothes donations monthly on our platform.	Assistance give the most needy groups basic needs.
WWF Malaysia	Environmental conservation	2 percent of the annual profits + Platform encouraging sustainable consumption.	In line with our environmental mission and decrease waste by reuse.

G. Do you intend to publicize your philanthropy? Why, or why not? If you do, explain how you will work your philanthropy into your marketing.

Yes, we will make publicity on our philanthropic activities because they are basically in line with our basic mission of establishing trust and empowering the B40 community. The fact that we make contributions to the community is a practical evidence of our dedication, and this is what sets us apart against the strictly business-oriented rivals. We will incorporate this in our marketing by taking several main directions: providing an active live Community Impact dashboard in our application to display the real-time outcomes of our collective actions, publishing our Social Impact Reports, making them transparent, sharing real-life stories of families assisted in collaboration with our NGO partners, and organizing themed campaigns like Donate a School Bag so that our users could engage in it directly. This plan will turn our philanthropy into a part of the user experience, not a peripheral event, and our community will experience the impact they assist in making and feel a part of it.

5.2 Pricing

A. Describe your pricing strategy and structure and the gross margins you expect to generate.

Table 5.7 Pricing Strategy and Expected Gross Margins

Product	Pricing Strategy (keystoning, cost-plus, penetration, skimming, meet or beat)	Expected Gross Margin
Core Transaction Platform	Meet or Beat	85-90%
Community Mutual Aid Features	Penetration	0%
Seller Value-Added Services	Cost-Plus	90-95%
Data and Business Services	Skimming	80-85%

B. What will your discount structure, if any, be? This would be an excellent place to include the pocket-price waterfall or the pocket-price band to illustrate the discount structure and how prevalent it will be.

Discount Strategy

Looplet will use a special discount system based on user activation and community reinforcement:

First-Time User Incentives: Customers who buy their products to the first time get a fixed RM5 voucher. New sellers will have no transaction fee on the first 3 listings.

Community Support Rewards: Community users receive Community Points when donating items or satisfying requests that can be redeemed to list boosts or fee waivers.

Loyalty & Referral Programs: The referrer and referee will be given a discount of RM3 on their subsequent purchase. Customers who make more than 10 transactions per month (active sellers) can have a lower commission (3% instead of 5%).

Pocket-Price Band

The use of these discounts establishes specific price ranges, which represent the real price of the various groups of users:

Seller Pocket-Price Band (Per cent of listing price)

Standard Seller: ~95% (less 5% standard commission)

New Seller: 100% (first 3 listing fee waiver)

Top Seller: +97% (3% loyalty commission rate)

Final-price band of buyer as a percentage of listing price.

Standard Buyer: 100% (no discounts)

New Buyer: ~75% (RM5 voucher on a RM20 product)

Community User: 85-100% (partial subsidies are based on points)

C. Will you accept personal checks from customers? Credit cards? Will you offer charge accounts or customer credit?

Table 5.8 Customer Payment Options		
Type of Payment	Accept? (yes/no)	Rationale
Cash	Yes	Critical in local pickup payments, especially to our B40 customers who might want to use cash to make payments. Fits our community-based strategy.
Personal checks	No	Fraud and lack of funds are high risks. Delays in processing would be inconsistent with our mission of making sellers receive their payments fast. Not viable on our digital platform.
Credit cards (which ones – VISA, MasterCard, American Express, Discover?)	Yes	Secure processing and widespread in Malaysia. Necessary to facilitate smooth online transactions and attract more categories of users such as students and young professionals.
Credit terms (if so, what will they be?)	No	Since we are a C2C marketplace that involves individual transactions, we need immediate payment so that sellers can get money in time. Provision of credit would pose an unwarranted financial risk and operational complexity to our startup.

5.3 Promotion

A. Identify the ways you plan to promote your product or service, including the message, the media, and the distribution channels. Describe why you have chosen these methods and why you think they will work.

Table 5.9 Promotional Plans

Method	Use?	When?	Message, Media, Channel	Rationale
Ad. specialties	Y	Always	Social Media	Continuous promotion through social media allows users to access platform information at any time, firmly establishing the brand image of "authenticity, safety, and affordability."
Banner ads	N	-	-	High cost and low exposure accuracy
Billboards	N	-	-	Billboards offer wide coverage but fail to target specific demographics accurately and are costly.
Blogs	N	-	-	Unable to effectively reach the core user group
Broadcast media	N	-	-	Broadcast media is expensive, has a wide coverage area, but low accuracy.
Brochures	Y	Always	Distribute in shopping malls and universities; introduce the platform and essential items guide, etc.	Increase product awareness so that potential users first encounter Looplet in real life, and then further enter the platform by scanning a QR code. Effectively explain the platform's core mechanisms to the target audience.
Business cards	Y	Always	Used for sharing and networking when the team	Increase exposure and enhance the platform's credibility.

			participates in activities.	
Catalog	N	-	-	Looplet is not a single sales platform, so this is not suitable.
Direct mail	N	-	-	High cost and low accuracy
Directories	N	-	-	Unable to convey the platform's core value
Flyers	Y	Always	Distributed in shopping malls, bus stops, and university bulletin boards	Low cost and precise coverage
Networking	Y	Always	School and shopping mall activities	Directly reach the core user group, increase platform registration and activity, and attract partners.
Newsletters	Y	Every month	Email and in-app push notifications; platform updates	It can enhance user retention and allow users to continuously understand the platform's value and influence.
Online store	N	-	-	The platform is not a traditional e-commerce store, but a transaction service platform, and therefore does not fit the concept of an online store.
Print media	N	-	-	High cost, lack of specificity
Public speaking	N	-	-	The human, material, and time costs invested are too high.

Sales calls	N	-	-	No fixed goal, time-consuming
Samples	N	-	-	This is unrelated to our platform; we do not produce samples.
Signs	Y	Always	Placed in universities, subway stations, shopping malls, etc.	Simple and convenient, it increases offline exposure and attracts users without social media presence.
Special events	N	-	-	High cost and long-time consumption
Sponsorships	N	-	-	High cost
Telemarketing	N	-	-	Users have a high aversion to telemarketing, it is costly, ineffective, and not feasible.
Toll free #	N	-	-	Very low usage
Web site	Y	Always	Official website, App download page	Able to clearly explain the platform's core functions, approval mechanism, and pricing transparency policy.

B. Show examples of marketing materials you intend to use.

1. Mobile App

- We will create a core trading platform, Looplet, where users can directly post, browse, buy, or donate second hand goods.
- We will use in-app announcements, banners, and push notifications to showcase discounted items, community stories, and donation events.
- This ensures users can quickly access core features, enhancing trust and engagement.

2. Office website

- Our website will showcase platform information, user guides, and community stories, and provide access to the app download.

- The website content will introduce the platform's core functions, such as buying and selling, the approval system, the request board, and the donation mechanism.
- The official website enhances brand credibility and professional image, allowing new users to understand Looplet's service advantages and social value.

3. Social Media

- User acquisition and engagement channels: Connect with users through Facebook, Instagram, and TikTok.
- Publish low-priced products, user stories, community support case studies, and promotional activities; encourage user sharing and participation.
- Enhance platform exposure, attract new user registrations, and spread Looplet's community empowerment and economic empowerment concepts.

C. What is your business slogan?

Swap. Sell . Donate. Because everyone deserves good things!

D. Do you have a logo for your business? How do you intend to protect it?

Yes, we have a professional corporate logo. We will apply for trademark registration with the Intellectual Property Department of Malaysia (MyIPO) to ensure your logo is legally protected and prevent unauthorized copying or use

E. Where do you intend to advertise (*be specific including identifying reach and frequency*)?

Table 5.10 Advertising Plan				
Publication/Media (name specific print publications or broadcast channels)	Size/Length of Advertisement	Frequency of Advertising & Time Frame	Reach	(Cost for Budget)
Social Media	Short videos (15–30 seconds) or text/image posts	2-3 videos per week	Potential users: 10,000–20,000	0
Mobile App	Small banner or full-screen push notification	2-3 posts per week, for 4 months	Registered users: 3,000–8,000	RM3000-4000

Official Website	Homepage carousel or feature introduction module	weekly updates	Potential users: 2,000–5,000/month	RM1500-3000
Networking	On-site promotional materials, flyers, or business cards	1-2 times per quarter	Potential users: 1,000–3,000	RM2000-4000

F. How do you plan to get publicity for your organization?

1. Social Media Promotion

- Utilize Facebook, Instagram, and TikTok to showcase low-priced products, user community stories, donation campaigns, and usage guides.
- Encourage users to share platform information, generating word-of-mouth marketing and attracting new user registrations.

2. Multimedia Cooperation

- Send press releases to online news platforms or in-car news outlets to promote Looplet's low-priced, affordable secondhand goods service platform.
- Increase the platform's social value exposure and attract the attention of potential users or partners.

G. How do you intend to provide superior customer service.

1. Clear Pricing & Affordability Guidelines

- The platform sets price caps and approval mechanisms to ensure that B40 users can obtain goods at affordable prices.
- By ensuring price transparency, misunderstandings and complaints are reduced, improving user satisfaction.

2. Feedback & Continuous Improvement

- Encourage users to rate products, sellers, and transaction experiences, and collect feedback to improve platform functionality.
- Regularly analyze feedback data to optimize approval processes, chat systems, and community interaction mechanisms, ensuring continuous service upgrades.

3. In-App Chat

- Both parties can communicate directly through the in-app chat function to quickly resolve issues related to price negotiations, product information, or face-to-face handover.
- Real-time customer support is provided to answer user questions, handle complaints or disputes, and ensure smooth transaction completion.

H. Identify five specific sales prospects you intend to pitch.

Table 5.11 Specific Prospects	
Name	Description (include interest)
University Students (B40-focused)	Description: Students from lower-income families, scholarship recipients often need affordable textbooks, electronics, and daily necessities. Interest: Interested in low-cost transactions and secondhand goods exchange to save money.
Healthcare Centers	Description: Small clinics or community health centers may have surplus medical equipment or nursing supplies. Interest: A safe and reliable donation platform is needed to channel these surplus medical supplies to families or organizations in need.
Low-Income Households	Description: Families with limited income looking for affordable household items, furniture, or appliances. Interest: They seek budget-friendly items and opportunities to sell unused goods for extra income.
Community Centers/NGOs	Description: Local organizations supporting B40 communities, often organizing events or workshops where members may need affordable items. Interest: Interested in facilitating access to low-cost products and promoting community sharing initiatives.
Small Businesses/Home Based Sellers	Description: Small-scale vendors or home-based businesses with surplus stock or secondhand equipment. Interest: Looking to monetize unused items and purchase necessary supplies at low cost.

I. How will you keep your customer database?

We manage our customer database through the Looplet platform, employing secure cloud storage and a rigorous user authentication system to ensure the protection of all user information. The platform complies with data privacy regulations; users can view and update their personal information at any time, and we regularly maintain the database to guarantee data accuracy. Through anonymized data analysis and trend prediction, Looplet optimizes functionality, enhances user experience, and provides reliable data support to community partners, thereby achieving secure, efficient, and valuable customer management.

J. What essential questions will you ask every customer for your database and what data do you anticipate securing? Why?

Table 5.12 Customer Data		
Question	Variable	Purpose
What is your full name?	Full Name	Verifying user identity provides a foundation of trust for transactions and community interaction.
What is your gender ?	Gender	Supports user statistical analysis, market trend forecasting, and personalized recommendations.
What was your birth year?	Birth year	Supports user statistical analysis, market trend forecasting, and personalized recommendations.
What is your email address?	Email address	Used for push notifications and customer service
What is your phone number?	Phone number	Used for account verification and transaction notifications
What categories of goods do you usually buy or sell?	Transaction categories	Personalized product recommendations, matching request board needs, and improved user experience.
How did you learn about the Looplet platform?	Promotion channels	Understand the effectiveness of user acquisition channels, optimize promotional strategies, and improve marketing efficiency.

Do you follow our social media accounts?	Social media following	Evaluate the effectiveness of social media promotions, understand user engagement, and optimize content strategies.
What are your requirements or expectations regarding the price of goods on secondhand platforms?	Price trend	Understanding users' acceptable price range allows for the optimization of pricing strategies, ensuring that platform products are attractive to customers.
Are you satisfied with our service?	Service satisfaction	Optimize user experience

5.4 Place

A. Where do you intend to sell your product? Describe the advantages and disadvantages of your location(s).

Table 5.13 Business Locations		
Location	Advantages	Disadvantages
School such as Taylors university & Sunway university	1. Reach young, active, and digitally proficient users 2. Encourage student registration and platform usage 3. Facilitate campus activities and club collaborations 4. Increase community engagement and mutual support 5. Facilitate word-of-mouth marketing and brand promotion	1. Limited activity reach 2. Requires coordination with school and student organizations 3. High manpower and time costs 4. Activity effectiveness is affected by student participation 5. Not suitable for year-round promotion
Shopping mall such as: Pavilion Mid valley	1. Directly reach customers who want to buy and sell secondhand goods. 2. Users can personally view and experience the products, increasing trust.	1. Events require rented space and labor costs. 2. Coverage is limited by venue and foot traffic. 3. Inventory and product display require additional management.

	3. Enhance brand awareness in the local community. 4. Facilitate on-site promotions and community events. 5. Help attract users outside of digital platforms.	4. Affected by weather and holidays. 5. Information updates are not as fast as online channels.
Gyms & Fitness Centers	1. High demand for selling or buying unused fitness equipment 2. Clear target audience, easy to promote secondhand trading 3. Activities can be organized to attract new users 4. Establish long-term partnerships to obtain continuous traffic 5. Helps promote healthy living concepts and community mutual assistance	1. Limited reach 2. Event organization requires manual coordination 3. Time and venue constraints 4. Promotional effectiveness is affected by gym member activity levels 5. Requires regular updates to cooperation content and promotional strategies

B. What are surrounding businesses? Access routes?

1. Taylors university

Surrounding businesses:

- The Geo shopping mall has a gym and a DIY supermarket.
- The Sunway Medical Center
- The Sunway Pyramid shopping mall has a secondhand market.

Access routes:

- Automobiles and personal transportation
Pedestrian overpass
- Public Transportation (Bus/Grab/BRT/Taxi/LRT stations)

2. Pavilion

Surrounding businesses:

Second-hand fitness equipment, medical equipment, clothing and other goods

Access routes:

- Public Transportation (Bus/Grab/BRT/Taxi/LRT stations)
- Automobiles and personal transportation

C. If vehicular traffic is important to your organization, what is the traffic count for this location?

Traffic volume isn't important to our business; we focus on foot traffic—the more the better. High-traffic locations directly bring in more potential users, increasing opportunities for platform registration, app downloads, and secondhand transactions, thereby enhancing Looplet's influence and marketing strategies.

D. What is the work force availability in the area as it pertains to your needs? (Be sure to get data from the census, local department of labor, or other reliable source.)

1. Labor Force Demographics

The labor force was approximately 17.23 million people in the first quarter of 2025. The unemployment rate is 3.2%, indicating a relatively healthy labor market (Department of Statistics Malaysia, 2024).

2. Industry Trends

Malaysian consumers are increasingly inclined towards sustainable consumption. Most secondhand buyers are focused on value and environmental protection, and reuse is becoming more and more popular in Malaysia, with people willing to extend the life of items rather than buying new ones outright (Carousell Press, 2021).

6.0 Management & Operations

6.1 Management Team

A. Create an organizational chart for your business.

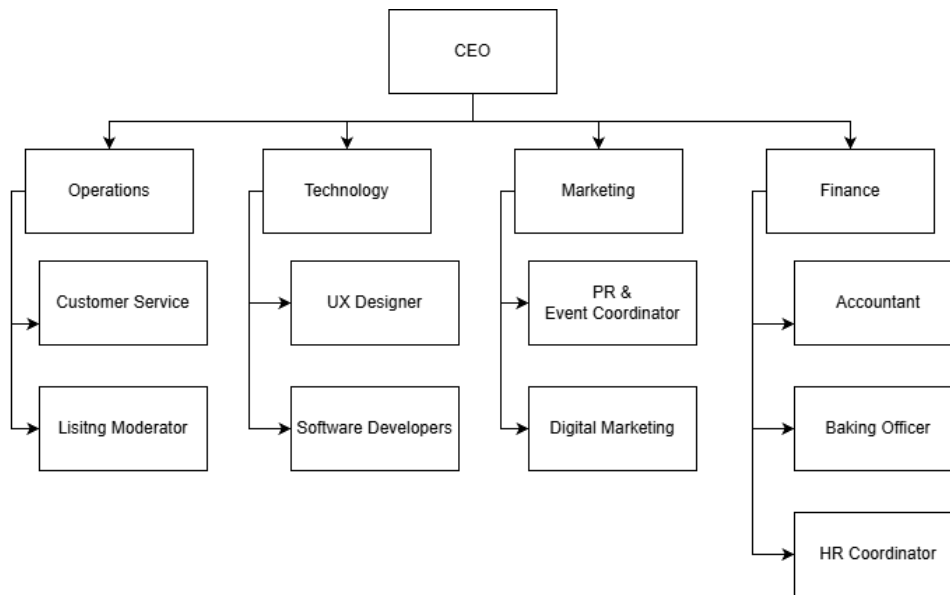

Figure 1-Loople's Organizational Chart

B. Will you be hiring employees? If so, describe what their qualifications should be, what you intend to pay them, and how they will help your business.

Table 6.1 Staffing Plan				
Employee Role	Qualifications	Compensation	Contribution	When Hired
Software Developers	Bachelor's Degree in Computer Science/Software Engineering. Experience in Mobile Development (Flutter).	RM 3500	Build and maintain the application, troubleshoot and improve system performance	Immediately
UX Designers	Certificate in UX/UI Design. Experience with Figma, user testing, prototyping	RM 2500	Improve the visual layout and user flow of the app Conduct user testing and refine	After 1 year after business stabilises

			the interface based on feedback	
Customer Service	Diploma in Customer Service. Strong communication skills (Malay, English, Chinese)	RM 2000	Assist customers with inquiries Handle feedback, complaints, and provide support	After 1 year when business stabilizes
Digital Marketing	Demonstrated experience in social media and online marketing Knowledge of SEO, ad campaigns, and content creation	RM 2300	Manage the company's online presence Run promotional campaigns and increase brand visibility	After 1 year when business stabilizes
Accountant	Bachelor's Degree in Accounting or Finance	RM 2800	Oversee financial records, expenses, and cash flow	After 1 year when business stabilizes
Banker	Bachelor's degree in Banking, Finance, or Business	RM 3000	Assist with financial strategies, grant applications, and banking matters Manage company financial risks	After 2 years when financial operations expand

HR Coordinator	Bachelor's degree in Human Resources or Business Administration	RM 2500	Manage hiring, onboarding, and employee relations Prepare payroll and maintain HR records	After 2 years when company expands and requires HR support
PR/Event Coordinator	Diploma or Bachelor's Degree in Event Management, Public Relations, Communications or Marketing. Organisational, communication, media handling and planning skills	RM 2500	Organise pop-up events, and promotional activities Able to manage press and engage the public	After 2 years when company needs more exposure and awareness
Listing Moderator	Attention to detail Good judgement and basic technical skills	RM 1800	Review, verify, and approve user listings	Immediately

C. Do you intend to pay yourself a salary, wage, dividend, or commission? Explain.

Any revenue generated will be used to repay startup-costs and cover basic operational expenses. Once business is stable, we will begin receiving salary to support daily living needs and dividends will only be considered after the business has grown enough profits to be able to operate smoothly without financial strain.

D. What will your primary policies toward employees be?

Table 6.2 Key Employee Policies

Policy	Purpose
Flexible work hours with remote options	To improve work-life balance while ensuring productivity.
Weekly performance check ins	To monitor progress, provide feedback and keep teams accountable.
Clear Leave Request Process	To ensure employees can plan time off without affecting company operations.
Clear Meeting Guidelines	To set agendas and limit duration to ensure time is used effectively.
Performance Incentives	To reward top employees with bonuses or recognition to motivate productivity.
Fail Forward Culture	To encourage employees to take calculated-risks and learn from mistakes without fear of punishment.

E. What will you do to make your company a positive and rewarding place to work?

Our organization plans to foster a collaborative culture where employees are encouraged to share ideas and opinions. We aim to create an environment where each employee feels heard and valued. To achieve this, we hold regular team meetings and maintain open lines of communication for feedback. We also provide recognition programs for achievements and offer personal development opportunities to motivate our staff.

F. Describe the corporate governance plan for your organization. It should include five policies (rules) that will be the backbone of your organization's ethics.

Our organization plans to enforce these policies to ensure integrity, accountability and transparency while safeguarding the interests of our stakeholders. We will provide regular training and briefings for employees to understand these policies and their importance. We will also conduct audits and maintain high ethical standards to earn and keep the trust of our users.

Table 6.3 Ethics Policies

1. Code of Conduct Policy
2. Confidentiality & Data Protection Policy

3. User Safety & Fraud Prevention Policy
4. Anti-Corruption & Bribery Policy
5. Whistleblower Protection Policy

G. Provide information for each of your mentors or advisors. If there is a board of advisors, list each member and describe his/her commitment to the board.

LECTURER

Name: Dr Nurlida Binti Ismail
Title: Associate Professor. School of Management & Marketing. Faculty of Business & Law
Organization: Taylor's University
Address: 1, Jln Taylors
City: Subang Jaya
State: Selangor
Zip: 47500
Phone: +603 5629 5667
Email: nurlida.ismail@taylors.edu.my

MENTOR

Name: Dr Maggie Leong
Title: Senior Lecturer. School of Management & Marketing Faculty of Business & Law
Organization: Taylor's University
Address: 1, Jln Taylors
City: Subang Jaya
State: Selangor
Zip: 47500
Phone: N/A
Email: maggie.leong@taylors.edu.my

H. Provide contact information for your accountant, attorney, banker, and insurance agent.

ACCOUNTANT

Name: Dr. Voon Yuen Hoong
Title: Partner – Tax
Organization: Crowe Malaysia
City: Kuala Lumpur
State: Federal Territory of Kuala Lumpur
Phone: N/A

ATTORNEY

Name: Amir Fahmi Annas
Title: Associate
Organization: Azmi & Associates
City: Kuala Lumpur
State: Wilayah Persekutuan Kuala Lumpur
Phone: +6012 670 8434

BANKER

Name: Michelle Yong
Title: Commercial Banker
Organization: OCBC Bank
Malaysia
City: Kuala Lumpur
State: Federal Territory of Kuala Lumpur
Phone: N/A

INSURANCE AGENT

Name: Barani Siva
Title: Insurance Agent
Organization: AIA Berhad
City: Kuala Lumpur
State: Federal Territory of Kuala Lumpur
Phone: +6012 332 1514

6.2 Research & Development

A. What type of research are you doing? What do you intend to do?

The research we will be conducting aims to understand the challenges faced by the B40 community including their access to items for daily living, affordability and the safety of transactions on existing platforms. We will also examine common problems experienced by regular users. The insights gathered will help guide the development of the app that addresses the issues of current marketplaces and provide a cost-effective and secure solution specifically tailored for the B40 group.

B. What are others in the industry doing?

Other competitors are not made specifically to support the B40 community. Their platforms mainly focus on general peer-to-peer buying and selling with additional charges that may not be affordable for lower income users. For instance, platforms like Carousell charge buyer protection fees which increases the overall costs for safer transactions. Although these fees are used to enhance security it may not be suitable for users who have limited financial resources. Additionally, security issues such as scams, fake listings and unverified sellers are common on these platforms.

C. How will you protect your intellectual property?

Table 6.4 Intellectual Property Protection	
Type	How It Will Be Used
Patents	Patents will be used to protect our unique technical features such as in-chat translation, approval systems for listings and the request board functionality.

Trademarks	None for now.
Service Marks	Protect the app's name, logo and branding.
Copyrights	Protect the app's source code, user interface, graphics and marketing content.

6.3 Physical Location

A. Describe the actual physical place in greater detail than above.

Our service does not have a physical shop for customers however the only physical points involved in our service are the e-lockers which are owned and managed by our third-party logistics partners. These lockers are generally located in areas with high traffic where parcel delivery and collection are common. Locations include apartments, shopping malls, public transport hubs, universities and office buildings.

B. What are the zoning laws in your area? Does your business comply?

In Malaysia the installation of automated facilities such as parcel lockers are allowed in commercial and mixed-use areas while residential zones may have restrictions or require additional approval depending on the regulations. Since we do not own or operate the e-lockers and rely on licensed logistics providers whose facilities are already approved and are legally operating in accordance with zoning regulations, our business remains compliant with all applicable zoning laws.

6.4 Facilities

A. What type of building and equipment will you have?

Our business will operate from a small office space with basic work areas and internet access. We will be using computers, laptops, smartphones for administrative work and to handle app operations. Since our business is fully online, we do not need a physical shop or warehouse.

B. Identify which technological tools you plan to use for your organization and explain why.

Table 6.5 Technology		
Technological Tool	Source	Value to Organization

Front-end	Flutter (Google)	Develops the front end of the app.
Back-end	Firebase Cloud Function	Handles server-side logic, APIs and integration with payment systems and delivery management.
AI moderation system	Google Cloud Vision	Verifies that images match the item description and are within the price limit.
Cloud Storage & Database	Firebase	Stores user data, item listings, transactions and media.
Payment System	iPay88	Enables multiple payment methods (e-wallets, online banking, cards).
Customer Relationship Management (CRM)	HubSpot	Tracks customer interactions to provide insights to better serve our users.

C. How do you plan to get access to the technology you need?

Most of the tools we use are open-source and offer paid subscriptions. Flutter is free while Google Cloud Vision, Firebase, iPay88 and HubSpot require subscriptions. As our app grows, we will be upgrading to higher tiers to access advanced features and handle higher usage.

6.5 Inventory, Production, & Quality Assurance

A. Where are you purchasing the products you plan to sell, or the parts you will use to manufacture those products? Illustrate your supply chain.

Table 6.6 Suppliers	
Product/Part	Source
N/A	N/A
N/A	N/A
N/A	N/A
N/A	N/A
N/A	N/A

B. Do you intend to manufacture your product? If so, describe the manufacturing process you will use. If not, describe how your product is manufactured.

N/A

C. Are there any economies of scale to be attained for your business? At what point do you anticipate attaining them?

N/A

D. Have you developed and/or adopted any innovations in production, inventory management, or distribution that are significant? What are they and why are they meaningful?

N/A

E. Show the production-distribution channel for your business, and the mark-ups along the chain.

Table 6.7 Mark-Up Structure		
Stage of Channel	Mark-up	Notes
N/A	N/A	N/A
N/A	N/A	N/A
N/A	N/A	N/A

F. What is the estimated delivery time between when you place an order with your supplier and when you will have the product available for your customers? (If there are multiple suppliers, you should identify each lead time and work on the basis of the longest lead time.)

N/A

G. What method(s) will you use to define and ensure the quality of your products/services?

Table 6.8 Quality Assurance		
Method	Planned? (y/n)	Rationale

Benchmarking	y	Compare our app performance and user experience with other competitors to identify areas for improvement.
Lean Manufacturing	n	Not applicable as we do not produce products.
ISO9000	y	Provides a framework for managing app development processes, documentation and testing to ensure consistent quality.
Six Sigma	n	Not applicable because it mainly focuses on reducing defects in manufacturing which is not relevant for an app.
TQM	y	Encourages team-wide focus on quality and continuous improvement.
Malcolm Baldrige National Quality Award	n	US based, not relevant for Malaysian Businesses.
Other: Software Quality Assurance (SQA)	y	Used to ensure the app is tested for quality and reliability.

H. What types of insurance will your business need, and why?

Table 6.9 Insurance		
Type of Insurance	Needed (y/n)	Why?
Workers' Compensation Insurance	y	Covers employees in case they get injured while working in the office.
Disability Insurance	n	Not required because our tasks are not physically intensive.
Commercial Fleet Insurance	n	Not needed because we do not own or operate any delivery vehicles.
Property Insurance	y	Protects office equipment and other company assets from damage or loss.
Liability Insurance	y	Protects the company in case someone makes a legal claim related to the app or services.
Product Liability Insurance	n	Not needed because we do not produce or sell products.

Business Income Insurance	y	Protects the business against income loss when the app goes down or operations are interrupted.
Errors and Omissions Insurance	y	Covers the company if mistakes or service issues in the app cause problems for our users.
Life Insurance—Key Person Insurance	n	Not required because the business does not depend on any single irreplaceable individual.

I. What methods will you use to ensure that you comply with federal, state, and local tax laws?

We will have a professional accountant responsible for ensuring our business complies with all federal, state and local tax regulations. They will also maintain accurate financial records and ensure taxes are reported regularly.

J. What laws—such as minimum wage and age requirements, health and safety regulations, or antidiscrimination laws—will affect your business?

Table 6.10 Laws Affecting Looplet Company	
Law	Effect on Business
National Wages Consultative Council Act 2011[Act 732]	Must provide employees with a minimum wage of RM1500
Personal Data Protection Act 2010 (PDPA)	Required to protect user data, get consent and ensure secure data handling
Consumer Protection Act 1999	Required to provide fair services, accurate information and protect consumer rights
Occupational Safety and Health Act 1994	Must ensure employees work in a safe and healthy environment
Electronic Commerce Act 2006	Must ensure all online business operations and transactions comply with e-commerce legal standards.

7.0 Financial Analysis & Projections

1. Describe your record keeping system.

Computer based digital systems.

2. List the types of financial accounts you will open for your organization.

Table 7.1 Financial Accounts		
Type of Account	Purpose	Which Institution?
Checking	- For day-to-day transactions - Customer payments	Maybank Business Account
Sweep	Transfer extra funds from checking account into savings to earn interest.	Hong Leong Bank
Investment	Used for investing into low-risk funds	RHB Bank
Other	-	-

7.1 Sources & Uses of Capital

A. How much capital do you need? When? What type and on what terms?

Table 7.2 Capital Requirments			
Type of Capital	Amount	When Needed?	What Terms?
Seed Funding	RM100,000	Year 1 (pre-launch phase)	Non-dilutive, preferred from SDG aligned grants or NGOs
Angel Investors	RM130,000	Year 1 - 2 (growth phase)	Equity based, 11% stake. Preferred from investors with SDG aligned goals.
Government Support Funds	RM50,000	Year 2	Conditional grants tied to B40 impact metrics

B. How will you use the money that you raise? Be specific.

Table 7.3 Uses of Capital			
Use of Capital	Amount	When Needed?	Notes
App Development	RM90,000	Year 1	Development of Looplet app, including core features, UI and UX.
Marketing	RM75,000	Year 1	Outreach to B40 community, social media campaigns and events.

Employee Salaries	RM180,000- RM280,000	Year 1 - 3	Hiring employees and Staff support.
Infrastructure and Cloud tools	RM24,000 - 45,000	Year 1 - 3	Hosting, data storage and scaling.
Security and Feature updates	RM57,000	Year 3	Advanced verification and fraud prevention.

C. List the items you will need to buy to start your business and add up the items to get your total start-up capital. Then, add a cash reserve of 10 to 50 % of your total start-up capital.

Table 7.4 Start-Up Investment		
Looplet		
Item	Cost	Estimate or Actual
<i>Start-Up Expenses</i>		
Certificates	500	Estimate
Certifications	1,000	Estimate
Expensed Equipment	5,000	Estimate
Financial Institution Fees	1,500	Estimate
Identity Set/Stationary	2,000	Estimate
Insurance	N/A	N/A
Licenses	2,500	Estimate
Marketing Materials	10,000	Estimate
Payroll (with taxes)	180,000	Actual(year 1)
Permits	1,000	Estimate
Professional Fees - Accounting	3,000	Estimate
Professional Fees - Legal	5,000	Estimate
Professional Fees - Other	2,000	Estimate
Rent	20,000/Yr	Estimate
Research and Development	N/A	N/A
Supplies - Office	N/A	N/A
Travel	N/A	N/A
Utilities	6,000	Estimate

Web Fees	24,000	Estimate
Other	12,000	Estimate
Total Start-Up Expenses	\$ 275,500	
Start-Up Assets		
Cash on Hand	10,000	Estimate
Building (if purchased)	N/A	N/A
Equipment (including installation)	5,000	Estimate
Furniture and Fixtures	N/A	N/A
Inventory - Raw Materials	N/A	N/A
Inventory - Semi-Finished Goods	N/A	N/A
Inventory - Finished Goods	N/A	N/A
Land (if purchased)	N/A	N/A
Leasehold Improvements	N/A	N/A
Machinery	N/A	N/A
Rent Deposit	5,000	Estimate
Signage	1,000	Estimate
Utility Deposits	1,000	Estimate
Vehicle(s)	N/A	N/A
Other 1	2,000	Estimate
Other 2	N/A	N/A
Total Start-Up Assets	\$24,000	
Total Start-Up Requirements	\$299,500	
Contingency Funds (10%)	\$29,950	
Start-Up with Contingency	\$329,450	

D. List the sources of financing for your start-up capital. Identify each source as equity, debt, or gift. Indicate the amount and type for each source.

Table 7.5 Start-Up Funding Sources

Funding Source	Equity	Debt	Gift
Angel Investor	1300,000		
Seed Funding			100,000
Government Support			50,000
Total Start-up Investment	\$280,000		

E. What is your payback period? In other words, how long will it take you to earn enough profit to cover start-up capital?

Payback = (Start-up Investment)/(Net Profit per Month) =
 280,000/68,480(Yr 3) = 4.1 years/ 49.2 months

F. Describe financing sources that might be willing to invest in your business in exchange for equity.

Angel Investors - High net worth individuals who invests in start-ups, normally with a strong social impact focus.

Government Backed Equity Firms (Cradle Fund) - Offers equity based support for digital start ups.

G. Describe any debt financing you intend to pursue. What is your debt ratio? What is your debt-to-equity ratio? Add a cash reserve of one-half your total start-up capital.

N/A

H. Do you plan to use bootstrap financing? Explain.

Yes, but partially. This is because it can help prove that the app has traction and credibility.

I. Do you plan to pursue venture capital? Why, or why not? List potential sources of venture capital.

Table 7.6 Venture Capital Investments			
Venture Capital Source	Type of Fund	Amount Available	Expected Terms
Cradle fund (Malaysia)	Government VC	RM150,000-200,000	10% Equity

500 Global	Impact VC	RM300,000-400,000	14% Equity and mentorship
Gobi Partners	Regional VC	RM250,000-400,000	11% Equity

Yes, Looplet will be using venture capital because it can help future scaling of infrastructure, support for security enhancement and market expansion.

7.2 Cash Flow Projections

A. List and describe your monthly fixed costs and add a cash reserve that covers three months of fixed costs.

Table 7.7 Monthly Fixed Costs		
Fixed Cost	Amount	Description
Utilities	500 (+1,500 cash reserve)	Utilities needed for HQ
Salaries	18,611.11 (+55,833.33 cash reserve)	Salaries of all staffs over 1 year period
Advertising/Marketing	5,972.2 (+17,916.6 cash reserve)	Marketing/advertising budget
Insurance	N/A	N/A
Interest	N/A	N/A
Rent	1,666.7 (+5,000.1 cash reserve)	HQ rental rate per month
Depreciation	N/A	N/A
Unexpected	8,000 (+24,000 cash reserve)	Act of God (AOG) funds, emergency funds
TOTAL	\$34,750.01 (+104,250.03 cash reserve)	

B. Create a projected cash flow statement for your business for the first four quarters and the second and third years of operation. Or use BizBuilder spreadsheets for this.

Table 7.8 Cash Flow Projection
Looplet Company
For the Period Ending

		1Q	2Q	3Q	4Q	YR1	YR2	YR3
Starting Cash	(+)	10,000	20,000	30,000	40,000	10,000	50,000	100,000
Cash in from Operations [Sales]	(+)	10,000	20,000	30,000	40,000	100,000	224,240	530,480
Cash out from Operations [Cost of Goods Sold, Expenses, Taxes]	(-)	90,000	90,000	90,000	99,000	369,000	344,000	462,000
Cash in from Investing [Equity Infusions, Earnings on Investments]	(+)	150,000	50,000	200,000	100,000	500,000	50,000	50,000
Cash out from Investing [Equipment Purchases, Repaying Investors]	(-)	10,000	5,000	5,000	8,500	28,500	20,000	30,000
Cash in from Financing [Loans]	(+)	N/A	N/A	N/A	N/A	N/A	N/A	N/A
Cash out for Financing [Repayment of Debt]	(-)	N/A	N/A	N/A	N/A	N/A	N/A	N/A
Ending Cash Balance [Starting Balance for Next Period]	(=)	<u>70,000</u>	<u>-5,000</u>	<u>165,000</u>	<u>72,500</u>	<u>212,500</u>	<u>-39,760</u>	<u>188,480</u>

C. Calculate the burn rate for your business.

$(\text{Cash} + \text{Revenue}) / (\text{Negative Cash Outflow per Month}) = (10,000 + 169,420) / (369,000 / 12)$

Number of Months Before Cash Runs Out = **5.8 months**

7.3 Balance Sheet Projections

A. Create a Projected Balance Sheet for your business for the first four quarters and the second and third years of operation.

Table 7.9 Balance Sheet							
Looplet							
As of							
	1Q	2Q	3Q	4Q	YR1	YR2	YR3
Assets							
Current Assets	70,000	-5,000	165,000	72,5000	212,500	-39,760	188,480
Long-Term Assets	10,000	15,000	20,000	28,5000	28,500	48,500	78,500
Total Assets	\$80,000	\$10,000	\$185,000	\$101,000	\$241,000	\$8,740	\$266,980
Liabilities							
Short-Term Liabilities	0	0	0	0	0	0	0
Long-Term Liabilities	0	0	0	0	0	0	0
Total Liabilities	\$0	\$0	\$0	\$0	\$0	\$0	\$0
Owner's Equity	\$80,000	\$10,000	\$185,000	\$101,00	\$241,000	\$8,740	\$266,980
Total Liabilities & Owner's Equity	\$80,000	\$10,000	\$185,000	\$101,000	\$241,000	\$8,740	\$266,980

7.4 Income Statement Projections

A. Create a Projected Income Statement for your business for the first four quarters and the second and third years of operation. (Note: you will need to create very detailed projections for the items underlying each of these. Such detailed projections would go into the appendices of your plan.)

Table 7.10 Income Statement							
Looplet Company							
For the Period Ending							
	1Q	2Q	3Q	4Q	YR1	YR2	YR3
Net Sales Revenue (+)	10,000	20,000	30,000	40,000	100,000	224,240	540,480
Cost of Goods Sold (-)	30,000	30,000	30,000	33,000	123,000	115,000	150,000
	_____	_____	_____	_____	_____	_____	_____
Gross Profit (=)	(20,000)	(10,000)	0	7,000	(23,000)	109,240	380,480
Operating Expenses (-)	50,000	50,000	50,000	55,000	200,000	190,000	250,000
General Expenses (-)	10,000	10,000	10,000	11,000	46,000	39,000	62,000
Other Expenses (-)	0	0	0	0	0	0	0
	_____	_____	_____	_____	_____	_____	_____
Net Income Before Taxes	(80,000)	(70,000)	(60,000)	(67,000)	(269,000)	(120,760)	68,480
Taxes	0	0	0	0	0	0	0
	_____	_____	_____	_____	_____	_____	_____

Net Income	<u>(80,000)</u>	<u>(70,000)</u>	<u>(60,000)</u>	<u>(67,000)</u>	<u>(269,000)</u>	<u>(120,760)</u>	<u>(68,480)</u>
-------------------	------------------------	------------------------	------------------------	------------------------	-------------------------	-------------------------	------------------------

B. Create a bar chart showing your Gross Revenues, Gross Profit, and Net Income.

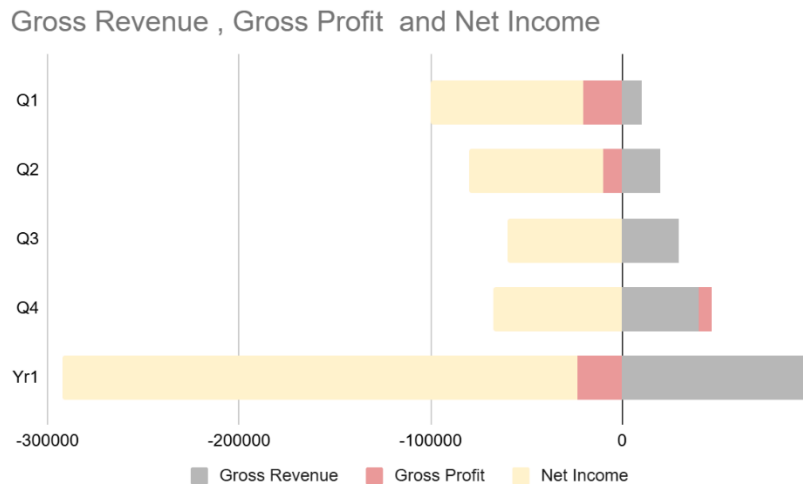

Figure 2-Bar Chart of Loople's Gross Revenues, Gross Profit, and Net Income.

7.5 Breakeven Analysis

Use Excel or another spreadsheet software to create a spreadsheet projecting the expenses for your business. Use this data to perform a breakeven analysis.

Breakeven Units = (Fixed Cost)/(Gross Profit per Unit) = _____

7.6 Ratio Analysis

A. Use your projected financial statements to calculate all of your key ratios.

Table 7.11 Ratio Analysis				
Ratio	Loople	Industry Data*	Variance	Explanation
Current Ratio	Infinite	1.5	N/A	because it is fully equity-funded
Quick Ratio	Infinite	1.3	N/A	because equity funding
Inventory Turnover	N/A	6-8 days	N/A	No inventory, service based
Ave. Collection Period	0 days	30 days	N/A	Reduces risk

Fixed Asset Turnover	N/A	3-5 days	N/A	Very minimal physical assets
Total Asset Turnover	0.41	1.2	N/A	Still scaling user traffic and revenue
Debt-to-Equity	N/A	1.0	N/A	Equity based
Debt-to-Total Assets	N/A	0.5	N/A	No debt
Times Interest Earned	Infinite	4-6	N/A	No interest in year 1
Gross Profit Margin	-23%	50%	N/A	High early COGs + low volume
Operating Profit Margin	-269%	10%	N/A	Heavy spending on development and marketing
Net Profit Margin	-269%	10%	N/A	Pre-profit startup
Operating Return on Assets	-112%	11%	N/A	Low revenue but high cost startup
Net Return on Assets	-112%	10%	N/A	Early stage losses
Return on Equity (ROE)	-112%	12%	N/A	Borned by equity
Earnings per Share (EPS)	-0.24 (estimated)	N/A	N/A	Loss making year
Price Earnings Ratio	N/A	10-18	N/A	No positive earning

7.7 Risks & Assumptions

A. List the risks and assumptions that underlie your financial projections.

Table 7.12 Risks and Assumptions		
Category	Risk/Assumption	Significance
General economy	Stable economic condition	Recession will reduce the spending power of B40, slowing platform adoption

Interest rates	Assumed manageable	Higher interest rates increases cost of borrowing and reduce cash on hand
Inflation	Assumed moderate	High inflation increases costs, increase burn rate
Economic health	B40 assumed to maintain minimal disposable income	Economic downturn will reduce frequency of purchases and supply of preloved goods
Tax rates	Assumed unchanged	New taxes will increase operating expenses
Industry growth/decline	Growth in resale continues	If prelove trend slows down, user acquisition and revenue growth weakens
Customer preferences	Assumed users preferred verified platforms	If users stick to competitor platforms, Looplet's adoption will slow down
Competitive entrants/changes	Strong competitors already exist	Competitors may adopt similar features, reducing differentiation
Prices	Looplet's pricing cap model remains attractive	If prices are too low, sellers might abandon the platform, if too high buyers lose interest
Costs of goods sold	Server fees and development costs assumed stable	Rising infrastructure costs will increase operating yearly expenses
Other (Technology)	Assumes platform runs smoothly with minimal downtime	Technical issues will reduce user's trust
Other	N/A	N/A

B. Identify any external factors that you feel should be disclosed as substantial risks. (incorporated above)

External factors such as economic instability, rising competition, rapid technological changes and user trust issues are substantial risks that Looplet will face.

8.0 Funding Request & Exit Strategy

8.1 Amount & Type of Funds Requested

A. Clearly state how much money you are requesting in this plan and the terms under which you anticipate obtaining the funds?

Looplet Ltd. requests RM500,000 in the form of convertible note financing.

The finances will be secured in the following terms:

Convertible Note Financing:

Amount: RM500,000

Term: 5 years

Interest Rate: 4% per annum

Conversion: The note shall automatically convert into equity at the next fundable round in the company, where the valuation will be 20% less.

B. Do you intend to use debt to finance your business? Explain.

Yes, we will strategically employ debt financing at the initial stage. Besides the convertible notes, we will also apply the Technology Innovation Loan provided by the SME Bank Malaysia that has the 6 months interest-free period and 3% government subsidy. This is a type of debt structure that will enable us to exercise equity control and raise the required growth capital.

C. Do you plan to issue bonds to finance your business at some point in the future?

No, we are yet to make any plans to issue corporate bonds. Being a startup, we are focused on the business model validation and profitability. At the maturity stage (estimated Years 4-5) when the regional expansion requires significant funding, we will reconsider the possibility of bond issuance. At this point, we would like to use equity financing and government-backed loan programs.

8.2 Exit Plan

A. How will investors get paid back/out? Public offering? Employee buyout? Merger or acquisition? Liquidation? Stock buyback?

Table 8.1 Investor Exit Strategy		
Form of Payment/Payout	Planned (yes/no)	Anticipated Time Frame

Repayment of debt	yes	Within 3-5 years
Public offering	no	
Employee buyout	no	
Merger/acquisition	no	
Liquidation	no	
Stock buyback	yes	Within 5-7 years

B. Do you plan to franchise your business, or license any of your products? Explain.

No, we are not planning to franchise or license our business because doing so would mean we have to share our system which reduces control over the platform. We intend to maintain full ownership of our system.

8.3 Milestones

Create a PERT chart for your organization to make your plans clear to potential investors.

Table 8.2 Milestones												
Looplet Company												
Task	Period 1	Period 2	Period 3	Period 4	Period 5	Period 6	Period 7	Period 8	Period 9	Period 10	Period 11	Period 12
Identifying problems related to SDG 1	x											
Market research and competitor analysis	x	x										
Define target market	x	x										
Define business goal and social impact goal		x										
Form the organization			x	x								
Design UI/UX prototype			x	x								
App and website development				x	x							
Finalize user verification and secure transactions.					x							
Testing functionality, user verification and transactions					x	x	x					
Fix errors and bugs						x	x					

Proposal preparation for partnerships with local logistic and NGOs/gov					X	X	X					
Prepare for marketing and brand awareness					X	X	X					
Soft Launch								X				
Collect feedback and report								X				
Refine based on feedback and reports								X	X			
Full App Launch									X	X		
Monitor app performance									X	X		
Make new features										X	X	
Continues app updates											X	X

Note: This chart should be as detailed as is useful in the business plan.

Resumes & Position Descriptions

1. Include a resume for each key team member.

Orion Chan Zen Ji

Subang Jaya, Selangor
012-519 3819
orionczj@gmail.com

EXPERIENCE

Huawei, Sunway pyramid — retail sales assistant

July 2022 - August 2022

- Built customer relationships by providing support and product guidance.
- Applied upselling techniques, achieving more sales and meeting team targets.
- Resolved customer concerns effectively and restored their trust with the brand.

Unbox.Asia, Sunway Geo — social media marketer

August 2022 - March 2023

- Created engaging content on phones, laptops and IOTs, increasing online visibility.
- Managed Facebook and Instagram marketing campaigns, strengthening the brand's presence.
- Engaged with customers online, addressing queries and fostering trust.
- Assisted with storefront sales.

GT Nelson Realty, Sunway Velocity - Real estate negotiator

January 2024 - current

- Supported clients from property searching, purchase, rental process.
- Analyzed and optimized listing to improve visibility and performance.
- Licensed to negotiate terms, ensuring a smooth transaction.

EDUCATION

Sri Emas International School, Petaling Jaya

GCSE | January 2018 - December 2021

Taylor's Lakeside University, Subang Jaya

Foundation in Arts | April 2022 - April 2023

Bachelors of Business specialization in Digital Marketing (HONS) | April 2023 - April 2026

SKILLS

- Digital marketing & social media management
- Sales & Negotiation
- Adaptability & problem-solving
- Calm under pressure with positive attitude
- Strong communication & customer engagement

LANGUAGES

- English (Fluent)
- Malay (Proficient)
- Mandarin (Proficient)
- Cantonese (Basic communication)

LICENSE

REAL ESTATE NEGOTIATOR

EDUCATION

Taylor's University

- **Foundation in Computing**
February 2023-January 2024
- **Bachelor's Degree In Computer Science**
April 2024- April 2026

CERTIFICATIONS

- AWS Certified Cloud Practitioner
- Oracle SQL Associate

SKILLS

- Backend Development & API Design
- Database Management (SQL / NoSQL)
- Cloud Deployment & AWS Services
- Testing & Debugging (Unit & Integration Testing)

LANGUAGES

- English (Proficient)
- Mandarin (Fluent)
- Malay (Basic)

PROFILE

I am an undergraduate in Computer Science with hands-on experience in backend development, database management, and building secure, efficient systems through academic projects and internships. I am eager to apply my problem-solving skills, attention to detail, and passion for writing clean code to real-world applications while continuing to learn and grow as a developer.

WORK EXPERIENCE

JUNIOR BACKEND DEVELOPER

ByteForge Technologies

May 2024-Present

- Assisted in developing backend features and services
- Supported database updates, migrations, and optimization
- Helped implement authentication and session handling
- Wrote and tested basic API integrations
- Debugged backend issues in live environments
- Monitored logs and identified performance bottlenecks

BACKEND DEVELOPER INTERN

ByteForge Technologies

January 2023-May 2024

- Assisted in developing RESTful APIs and backend services.
- Participated in database design and optimization tasks.
- Implemented basic authentication and authorization features.
- Collaborated with the team to debug and improve system performance

Figure 5- Resume of Sureena Kulasingam

WU BIN

+60179442628

0374383@sd.taylors.edu.my

EDUCATION

Civil Engineering Yangling University

2017-2020

Bachelor's degree in Computer Science

Taylors University

2024-

EXPERTISE

- Civil engineering budget
- CAD, BIM and other software applications
- Drawing design
- natural language processing
- Python programming

LANGUAGE

- English
- Chinese

PROFILE

A graduated civil engineering student currently pursuing computer science with a focus on artificial intelligence. Possesses solid engineering thinking and problem-solving skills, along with fundamental skills in machine learning, deep learning, and data analysis. Familiar with common AI tools such as Python and Scikit-Learn. Demonstrates strong learning and teamwork abilities, and actively participates in AI application-related courses and projects.

WORK EXPERIENCE

Xi'an Hancheng Design Institute

2021-2022

architectural designer

Collaborating with civil engineering companies, responsible for designing structures, water and electricity systems using software such as CAD and BIM.

China Resources Wind Power Co., Ltd.

2022-2024

Deputy Project Manager

Responsible for coordinating on-site issues, ensuring material delivery, supervising photovoltaic installation, ensuring worker safety, and maintaining the factory environment.

CERTIFICATE

- COMPUTER LEVEL 2 CERTIFICATE
- LEVEL 2 BIM SENIOR MODELER
- IBM ARTIFICIAL INTELLIGENCE ENGINEERING

LICENSE

CompTIA Security+

PROFILE

Proactive and detail-oriented Computer Network and Cybersecurity student proficient in Java and Python, with a strong foundation in secure system architecture and intuitive UI/UX design. Proven ability to apply technical skills in practical settings, having developed secure backend modules using Java and implemented scripting solutions with Python for a fitness application project. Eager to leverage this unique blend of programming, security, and design skills to build robust and user-friendly digital solutions.

WORK EXPERIENCE

Cybersecurity Intern

2021 – 2022

- Executed weekly system vulnerability scans, identifying and documenting 15+ potential security risks to assist the team in reducing average remediation time by 20%.
- Developed an automated log analysis script using Python, increasing the efficiency of repetitive tasks by 50%.
- Assisted in conducting penetration testing for a client's system and authored a detailed security assessment report that received positive client feedback.

UI Designer & Development Member

2022 – 2023

- Led the UI/UX design for a fitness application's main interface using Figma, creating wireframes and high-fidelity prototypes that improved interface operational fluency by 30% through user testing.
- Developed user authentication and data encryption modules applying Java and cybersecurity knowledge to ensure secure storage and transmission of user personal information and exercise data.
- Utilized Python to develop data processing scripts for analyzing anonymized user fitness data, supporting personalized training plan features.

EDUCATION

Taylor's University | Subang Jaya, Malaysia

2024 – 2026

Bachelor of Computer Science

Relevant Coursework: Network Security, Cryptography, Secure Software Development, Penetration Testing Fundamentals, Intrusion Detection Systems

Figure 7- Resume of Li Fu Yang

ALYSHA YASMINE BINTI M YAHYA

Computer Science student specializing in Cybersecurity, seeking a 3-month internship starting in April 2026. I am motivated, resilient, adaptable, and quick to learn, with a strong ability to perform under pressure. . Open to various areas within tech, I'm eager to apply my skills, contribute to meaningful projects, and gain practical industry experience.

- Platforms and Environments**
Linux . AWS (Basic) . Azure (Basic)
. Jupyter Notebook . VirtualBox

EXPERIENCE

Eye Level Learning

Mathematics and English Tutor

March 2021 - July 2021

- Tutored students aged 4–17 in Math and English, focusing on foundational skills and critical thinking.

Skills developed

- Adaptive communication
- Lesson planning and personalised instruction
- Patience and classroom management
- Critical thinking facilitation

INTERESTS

- Piano, Guitar, Trumpet
- Hiking, Pickleball

EDUCATION

- International Semester Exchange Programme** Jan 2025 - June 2025
 - University Of Birmingham, United Kingdom
- Bachelors in Computer Science (Cybersecurity)(Hons)** 2023 - Present
 - Taylor's University Lakeside Campus
- Pre-Engineering Preparatory Program – Pre-France** 2022 - 2023
 - University Kuala Lumpur - Malaysian France Institute
- Malaysian Certificate of Education- SPM** 2017 - 2021
 - Tunku Kurshiah College, Negeri Sembilan

TECHNICAL SKILLS

- Networking protocols** – Understanding of TCP/IP, HTTP, and DNS for system communication and troubleshooting
- Cybersecurity tools** – Hands-on experience with Wireshark, Nmap, Metasploit, and basic cryptographic methods including encryption, hashing, and key management
- Operating systems** – Knowledge of memory management, process handling, and system internals (Linux-focused)
- Databases** – Proficient in SQL normalization and schema design for efficient data handling
- Cloud platforms** – Basic experience with AWS and Azure for deploying and managing cloud-based services
- Computer architecture** – Understanding of how code interacts with hardware, including memory and CPU fundamentals
- Algorithms & problem-solving** – Strong grasp of data structures and algorithmic thinking for optimized code and technical interviews

UNIVERSITY PROJECTS

- Pacman Game (Java)** – Built a playable game using OOP and custom game logic
- Used Car Price Prediction (Python)** – Applied regression models on Kaggle dataset
- Carbon Footprint Estimator (Java)** – Developed OOP-based tool to calculate daily carbon impact

ASSOCIATIVE EXPERIENCE

- Director of PR and Marketing of Traditional Club** 2024-2025
 - Taylor's University Lakeside Campus
 - Assembled and performed traditional dance for events
 - Produced creative posters for all events
 - Managed overall club updates
 - Lead the team in securing sponsorships.
- Volunteer** 2021-2022
 - Zoo Negara Keeperku Program - Involved in daily maintenance and housekeeping tasks
 - PERTIWI Soup Kitchen - Participated in CSR work at the KL Pusat Gelandangan

Declaration Form

Taylor's University / Taylor's College

ASSESSMENT SUBMISSION AI DECLARATION FORM

Module Code:	BUS61104
Module Name:	Ideating Startup
Assessment:	Group Assignment

Student Name:	1. Vanessa Louise Farrin 2. Valeska Adelaide Yang 3. Sureena Kulasingam 4. Alysha Yasmine 5. Victoria Heidi 6. Orion Chan Zen Ji 7. Li Fu Yang 8. Wu Bin
Student ID:	1. 0374045 2. 0376688 3. 0361424 4. 0369726 5. 0360658 6. 0354104 7. 0371945 8. 0374383
Semester/Year:	September 2025

Dear Students,

Taylor's University/College upholds the highest standards of academic integrity. Students must complete their work honestly and ethically, ensuring that all submitted assignments reflect their own understanding and efforts. Any form of academic misconduct, including but not limited to plagiarism, collusion, contract cheating, falsification, and unauthorized use of

AI tools, is strictly prohibited and will be subject to disciplinary action in accordance with university regulations.

In this form, there are two (2) sections namely: **Section 1 Instruction on the use of Generative Artificial Intelligence** (to be completed by the module leader) and Section 2 Student Acknowledgement and Declaration (to be completed, signed and submitted by the students together with their assessment).

Students are responsible for properly acknowledging all sources, tools, and external contributions in their work. Misuse of AI-generated content, failure to attribute sources, or engagement in dishonest practices may result in penalties ranging from warnings to expulsion, as outlined in the **Student Handbook** ([link](#)).

This Assessment Submission Declaration Form is attached to the assessment brief. **Students are required to complete the Assessment Submission Declaration Form in any piece of work submitted** at Taylor's University/College, except for assessments completed and submitted in controlled environments. **For group assessments, each member of the group must complete an Assessment Submission Declaration Form.**

SECTION 1: INSTRUCTION ON THE USE OF GENERATIVE ARTIFICIAL INTELLIGENCE FOR THIS ASSESSMENT

The section below is to be completed by the module leader, i.e. module leader is to put a 'v' in the relevant checkbox.

☒ Guided use of Gen AI

Students are allowed to use Gen AI as stipulated by lecturers in the assessment brief:

1. Use lecturer-approved Gen AI tools only for certain parts of an assessment (e.g. brainstorming, proofreading etc.) or the entire assessment.
2. Use Gen AI for specific purposes only, such as generating drafts, refining language, or conducting exploratory analysis, but not for creating final outputs or core analytical tasks.

☐ Flexible use of Gen AI

You are allowed to use Gen AI tools in any way you find appropriate for the task, provided you acknowledge and explain their usage. This emphasises transparency, critical engagement, and ethical practices.

☐ Use of Gen AI is not applicable

Assessment is conducted under controlled environments. Students are to complete the task independently, without the assistance of Gen AI tools.

Where Gen AI tools have been used, you must attach your chat history and an appendix listing the prompt used, the output generated by the generative AI tools, how the output was used and the pages where the AI-generated content can be found as per the table below:

AI Tool Used	Prompts	Outputs	How the output was changed for use into the assignment	Specify the page(s) in the assignment where the output is used
Example: ChatGPT	"Describe principles of marketing in 30 words"	The principles of marketing focus on understanding customer needs, creating value, building relationships, targeting specific markets, using effective promotion, ensuring product accessibility, pricing strategically, and fostering long-term loyalty and satisfaction.	The principles of marketing, as outlined by Kotler and Keller (2016), emphasize the importance of understanding customer needs, creating value, and building strong relationships. Key elements include targeting specific market segments, implementing effective promotional strategies, ensuring product accessibility, employing strategic pricing, and fostering long-term customer loyalty and satisfaction through a customer-centric approach (ChatGPT, 2024).	Page 1

The AI-generated content must be appropriately cited and referenced. Any work submitted using AI tools without proper citation and referenced will be treated as though it was plagiarized.

INFORMATION ON PENALTIES RELATING TO ACADEMIC MISCONDUCT

Any student found to have engaged in academic misconduct, including but not limited to plagiarism, falsification, contract cheating, or improper AI usage, will be subject to disciplinary action. Penalties may include but are not limited to plagiarism, falsification, contract cheating, or improper AI usage, and will be subject to disciplinary action. Penalties may include but are not limited to:

The penalties that can be imposed on a student who is found to have engaged in academic misconduct include, but not limited to:

- Counseling or cautioning.
- Awarding zero marks for the assignment.
- Failing the module.
- Suspension from enrollment at Taylor's University/College.
- Expulsion from Taylor's University/College.

For full details, refer to the Student Handbook ([link](#))

INFORMATION ON INVESTIGATION PROCESS REGARDING SUSPECTED MISUSE OF GENERATIVE ARTIFICIAL INTELLIGENCE TOOLS

If an assignment is suspected of improper AI use or other academic integrity violations, the university will follow the official Academic Integrity Investigation Process, which includes:

- Initial Assessment**-The lecturer assesses inconsistencies in writing style, AI detection reports, or academic dishonesty concerns.
- Filing of Report** -A Report on Academic Misconduct (THE-ACA-FORM-AINT) is submitted to the Academic Integrity Officer (AIO).
- Review & Evidence Collection** – The AIO compiles relevant materials, including previous submissions, Turnitin reports, and AI usage logs.
- Student Explanation** – The student may be required to provide additional evidence of their work process, including drafts and source materials.
- Disciplinary Review** – The Student Disciplinary Committee (SDC) will determine penalties if misconduct is confirmed
- Final Decision & Notification** – The student receives formal notification of the decision, and records are updated accordingly.

For full details, refer to the Student Handbook ([link](#))

SECTION 2: STUDENT ACKNOWLEDGEMENT & DECLARATION

(*This section is to be completed by students. Students must submit the completed and signed copy of the acknowledgment and declaration form together with their assignment)

Acknowledgment by the student

When Gen AI is allowed to be used, acknowledgement of how Gen AI is used can be included as follows:

(Place a tick '✓' in the checkbox where relevant)

	Type	Acknowledgement
	Generative AI is allowed but student chooses not to use it	I did not use any generative AI tools for this assignment.
	Generate content which is modified in the final assessment submission	I acknowledge the use of to general materials such as in this assessment. I have also provided the prompt used, the output generated by the generative AI tools, how the output was used and the pages where the AI-generated content can be found.
✓	Use AI to polish language before further modification for final submission	I acknowledge the use of ChatGPT to improve the academic tone and accuracy of language, including grammatical structures, punctuation and vocabulary. I have also provided the prompt used, the output generated by the generative AI tools, how the output was modified further to better represent my tone and style of writing. <i>Note: Please modify the above as per your lecturers' needs</i>
	I attached Appendix in this assignment the chat history, including all the prompts that I used and the output from the Gen AI tool(s) for this assignment.	

The use of AI has to be referenced appropriately according to the referencing style as required:

Referencing style	In-text citation	Reference
APA	... (AI platform, year)	Company. (year). <i>Platform Used</i> (version) [model]. URL Example: OpenAI. (2023). <i>ChatGTP</i> (Mar 14 version) [Large language model]. https://chat.openai.com/chat
MLA	 ("prompt").	"Description of prompt" prompt. <i>Name of AI tool</i> , version of AI tool, Company, date text was generated. URL. Example (Text): "Identify the themes in Mcteague by Frank Norris" prompt. ChatGPT, 21 November version, OpenAI, 4 Dec.

		2023. https://chat.openai.com/share/2f2be19d-eadd-4151-8ceb-0785319074b3 Example (Image): Fig. 2. "Create impressionist painting of a cat using neutral colors" prompt. DALL-E, version 2, OpenAI, 27 Nov. 2023. https://labs.openai.com/
Harvard	... (AI platform year)	There is no guideline for Harvard style on referencing the use of AI. The following format is recommended by most universities. Name of AI (Year of communication) Medium of communication. Receiver of communication, Day/month of communication. Example OpenAI ChatGPT (2023) ChatGPT response to Mary Jane, 25 January 2024

Declaration

I confirm that:

- a) I understand what constitutes academic integrity violations, including plagiarism, collusion, fabrication, falsification, contract cheating, and improper use of GenAI.
- b) I confirm that my work or any part of this assessment has neither been previously and is not concurrently submitted for any other programme at Taylor's University or any other institution, save except when re-use of the same work is permitted by the module leader.
- c) I acknowledge that using GenAI or any external assistance without proper attribution constitutes academic misconduct and may be sanctioned accordingly.
- d) I understand that if there are indications of academic integrity breaches, including improper GenAI use, my work will be subject to investigation.
- e) This assignment is my own work, and I have properly acknowledged all sources, tools, and external contributions, including the use of GenAI where applicable.
- f) I acknowledge and authorize the submission and/or storage of my work in a database for the purpose of verifying its originality and/or conducting tests using artificial intelligence software, and I hereby consent to this process.
- g) I acknowledge that this submission is subject to Taylor's University/College Academic Integrity Procedure (THE-ACA-PROC-AINT) and all applicable university regulations.

Marking Rubrics

Assessment Task 1: Group Assignment – Business plan (50%)

MLO 2	Sub-Attributes	Weight	Outstanding (9-10)	Mastering (6-8)	Developing (3-5)	Beginning (2-0)	MARKS
2a.1	Identify the problem	5	Identify the problem critically with an insightful problem statement listing substantial relevant contextual factors.	Identify the problem with a well-defined problem statement listing major relevant contextual factors.	Identify the problem with a moderately detailed problem statement listing some relevant contextual factors.	Identify the problem listing few relevant contextual factors in a superficial way.	
2a.2	Propose solutions to existing and emerging problems	5	Develop a comprehensive and consistent plan to solve problems and recognize consequences of solutions that articulate a reason for choosing a solution.	Develop a feasible and consistent plan to solve problems and recognize consequences of solutions that articulate a reason for choosing a solution.	Develop a feasible plan to solve problems and recognize some consequences of solutions that articulate a reason for choosing a solution.	Develop a plan to solve problems and recognize few consequences of solutions that articulate a reason for choosing a solution.	
2a.3	Implement a solution	5	Implement a solution and monitor the process in a manner that addresses, thoroughly and in-depth, multiple contextual factors.	Implement a solution and monitor the process in a manner that addresses contextual factors.	Implement a solution and monitor the process in a manner that addresses limited contextual factors.	Implement a solution and monitor the process in a superficial manner that does not directly address contextual factors.	
2b.1	Flexibility and divergent thinking	5	Integrate information from multiple perspectives and is able to shift readily from one perspective to another.	Explore information from multiple perspectives.	Generate information from few perspectives.	Provide information from a single perspective.	
2b.2	Creative thinking	5	Extend a novel or unique idea, question, format, or product to create new knowledge or knowledge that crosses boundaries.	Create a novel or unique idea, question, format or product.	Experiment with creating a novel, unique idea, question, format or product.	Reformulate a collection of available ideas.	
TOTAL MARKS (25 MARKS)							

MLO 3	Sub-Attributes	Weight	Outstanding (9-10)	Mastering (6-8)	Developing (3-5)	Beginning (2-0)	MARKS
7.1	Demonstrate growth and entrepreneurial mindset	10	Consistently demonstrate the self as an innovative 'agent of change' in the complex and dynamic environments and/or contemporary real-world setting.	Occasionally demonstrate the self as an innovative 'agent of change' in the complex and dynamic environments and/or contemporary real-world setting.	Heightened awareness of the self as an innovative 'agent of change' in the complex and dynamic environments and/or contemporary real-world setting.	Minimal awareness of the self as an innovative 'agent of change' in the complex and dynamic environments and/or contemporary real-world setting.	
7.2	Identify opportunity that delivers value	5	Consistently address the open, complex and networked problems, challenges and identify opportunities in today's world that create and captures value (students to scope and realise ideas that can create social, cultural and/or economic value).	Address the open, complex and networked problems, challenges and identify opportunities in today's world that create and captures value (students to scope and realise ideas that can create social, cultural and/or economic value).	Identify problems, challenges and identify opportunities in today's world that create and captures value (students to scope and realise ideas that can create social, cultural and/or economic value).	Identify problems, challenges and identify opportunities in today's world that delivers value.	
7.3	Manage resource and potential risks	5	Effectively channel and manage resources and potential risks to drive solutions in the complex and dynamic environments and/or contemporary real-world settings.	Channel and manage resources and potential risks to drive solutions in the complex and dynamic environments and/or contemporary real-world settings.	Describe and explain concepts of resource and risk management to drive solution in the complex and dynamic environments and/or contemporary real-world settings.	Have awareness of concepts of resource and risk management to drive solutions in the complex and dynamic environments and/or contemporary real-world settings.	

7.4	Execute solution to deliver value	5	Discover and realize ideas and solutions that create and captures value (students to scope and realise ideas that can create social, cultural and/or economic value) in a novel way.	Discover and realize ideas and solutions that somewhat create and captures value (students to scope and realise ideas that can create social, cultural and/or economic value) in a novel way.	Propose ideas and solutions that attempt to create and capture value (students to scope and realise ideas that can create social, cultural and/or economic value) in a novel way.	Identify ideas and solutions that creates and captures value (students to scope and realise ideas that can create social, cultural and/or economic value) in a novel way.	
TOTAL MARKS (25 MARKS)
